

## Advanced Coatings for Night-Vision Display Compatibility

### Applications:

- NVIS Compatibility for LCD panel displays
- Radiance to Mil-85762A standard
- Conventional & LED compatible designs
- Backlight & Sidelight format options

### Effective Blocking:

A highly effective combination of optical filter coating & absorbing glass for NVIS compatibility of flat panel displays.

- Meets Mil-85762A Radiance limits
- Wide angle performance
- Can be customised to illuminant options
- Suitable for insertion in COTS units

### Display Format:

A flexible format for several current & emerging display structures.

- Options for EL and LED illuminants
- Backlight & sidelight compatible
- Non-disruptive to polarisation
- Can be fitted pre- or post- LCD panel
