# SERVICE LETTER

Service Letter No. L247F  
(Supersedes Service Letter No. L247E)  
July 20, 2016

TO: All Owners and Operators of Lycoming Aircraft Engines

SUBJECT: Shelf Life Requirements

REASON FOR REVISION: Table 1 - Shelf Life updates

**NOTICE:** Incomplete review of all the information in this document can cause errors. Read the entire Service Letter to make sure you have a complete understanding of the requirements.

This Service Letter identifies the shelf life of parts used on Lycoming engine models, as well as the new PERISHABLE MATERIAL Form. The shelf life, in calendar quarters (three months duration), is the length of time a part can be stored on the shelf and be serviceable.

Table 1 in this Service Letter identifies the shelf life for parts used on Lycoming engines. Table 2 is a list of part numbers and descriptions for pre-packaged parts from Lycoming Engines' suppliers that contain shelf life and cure date information for that part.

Parts sent from Lycoming Engines have a minimum of one year (four quarters) of shelf life beyond the invoice date. Parts also have a cure date, which is the date that the part was manufactured. The shipped part comes with cure date information as shown on Perishable Material Form 2629 (Figure 1). The cure date information must stay with the part until the part is assembled on an engine.

Another PERISHABLE MATERIAL Form 2629A, shown below in Figure 2, is used to enter a “Recert Date.” This Form 2629A is used by the Lycoming Engines’ Quality department during re-certification of all non-metallic parts that have less than one year of remaining shelf life. Lycoming Engines reserves the right to re-test any non-metallic parts and extend the shelf life of conforming non-metallics.
