

More options,
more flexibility and
more choices for
data centers.

Introducing the new 250 Amp STARLINE Track Busway

The benefits of STARLINE Track Busway are clear. Our modular, scalable and flexible electrical distribution system has become an industry leader for data center and mission critical applications. Continuing with our dedication to proven innovation, we have developed the STARLINE 250 Amp Busway to give you another option when responding to the changing power needs and rating requirements for your facilities.

Features

- Increased electrical rating of 250A continuous current
- 250 Amp and 400 Amp plugs from STARLINE are interchangeable
- Halogen free
- Double neutral and isolated ground versions available
- Most reliable plug-in design with the least amount of electrical connections from the busway to your load
- Every order is custom built to your needs and ships quickly
- Maintenance-free track busway design has been field-proven in data centers for over 20 years.
- Multiple busway feed options: end, top, center - for installation flexibility.

Ratings

- 250A/600V, either A.C. or D.C.
- Optional double neutral
- Plug-In units rated 125A/600V
- Meets UL 857 Standard
- Adheres to IEC Standard 60439-1,2
