

Everyone Likes Ice Cream.

Everyone Will Love Mini Melts!

That's why we say, "Taste it and Love it". Of course, not all ice creams are created equal.

Mini Melts offers something wholly different...

Mini Melts looks and tastes different.

MiniMelts is a fun, great tasting ice cream with a novel appeal. We flash freeze our 14% butterfat blend at extremely cold temperatures. This eliminates the air and ice crystals found in conventional ice cream. The resulting process forms our ice cream into fun shapes and sizes!

Ice cream is only as good as the ingredients it is made from. MiniMelts is created using one of the highest quality base mixes used only by a few ultra-premium ice cream companies. We challenge you to taste the difference for yourself!

The unique and superior flavors of MiniMelts Ice Cream are enhanced by storing and serving the products at the extremely low temperature of minus 40 degrees. We specially modify all of our equipment to maintain this extreme cold temperature. Kid and adults love the novelty of our MiniMelts Ice Cream...but it is the taste that keeps them coming back again and again!

Every cup has a sealed lid and the spoon is right inside the cup!

### 7 Great Flavors:

Banana Split -Cookies and Cream- Rainbow Ice (Dairy Free)

Birthday Cake - Cookie Dough- Cotton Candy - Chocolate
