

Here is the stock mini bike and 4-wheeler hill. It is 645 feet long with 250 feet of vertical elevation gain.

Here is the view looking straight up the stock big bike hill which is 1,045 feet long with 450 feet of vertical elevation gain.

At 1,700 feet long with 710 feet of elevation gain, our pro hill is the longest and tallest in the world of hillclimbing. The 700 and Open route goes to the right of the trees, then crosses the gully where it angles up a terribly steep wall to the left. 450's, 600's and 40+ run on the left side of the trees.
