

CYDONIA MALL MAUSOLEUM

The purpose of this illustration is to approximate the scale of how large the Face of Mars mausoleum to the 'God' Ala-lu is in comparison to the core of the District of Columbia, the Mall. In comparison, the Martian mausoleum is massive in size taking up the entire width and breath of the Mall from the base of the Washington Monument to the Capital Hill for example. The various measurements typifies the Luciferian signatures of sacred numbers.

The scale of the Pleiadian Pyramid City approximates the relative size of a modern metropolitan city core. The only difference is that the various structures were massive in size.

Due to the topography, Washington DC is one of the few places on Earth where the Martian Motif of the pyramid complex nearly approximates the positioning of the 3 structures on Mars.

CYDONIA, MARS
 Pyramid Complex

Face of Mars

Pleiades City

NASA Cover-ups

The size of the Face of Mars appears to be in phi ratio to the Capital Hill an the Washington Monument and the White House.

'Face'
 OWL GOD MOLECH

Capital Hill

The Mall

2520 yards

Jefferson Monument

White House

Pentagon Fortress

Is it any coincidence that the size of the Face of Mars would envelope the entire Washington DC Mall area. The size of the Pentagon Fortress would look like a massive mountain. The Mall can be likened to the Baphomet template with the Obelisk as the male organ, the Capital Hill is the 'flaming torch. The hands, one above and one below are the 2 triangles of the hexagram or the Star of Ramphan.

233° heading and 25,200 ft perimeter

2520 yards

MALE

FEMALE

SHAFT OF BA'AL
 666 ft total length
 666 inches pyramidion
 666 inch square base
