*itms*WebClient

RDM's Web-Based Image & Transaction Management System

The most secure, feature-rich, web-based payments processing platform that facilitates the electronic deposit of payments received by paper checks.

Whether you are a corporate biller, a merchant, or any type of business collecting paper checks, RDM's ITMS WebClient is the ideal solution for you. The ITMS WebClient can be deployed quickly and easily so you can immediately take advantage of the efficiencies and cost savings associated with check electronification (ACH, Check 21 and Image Exchange).

The ITMS WebClient has an intuitive modular interface that is easy to use and configure. Its main design concept takes advantage of familiar web-based conventions that guide the user through the check deposit process, requiring minimal training to get you up and running.

Benefits

- ✔ **Reduces costs of implementation** through its web-based deployment, installation, configuration and maintenance

- ✔ **Enhances security of payment information** as scanned checks are captured directly to a secure website (no data is stored locally)

- ✔ **Increases efficiency and productivity** by enabling different tasks to be performed electronically across multiple workstations

- ✔ **Streamlines the daily check processing workflow** by processing checks and remit data electronically

- ✔ **Provides for faster availability of funds** by immediately uploading payment information to the bank during the day

- ✔ **Increases the accuracy of balanced deposits** with its automated Courtesy and Legal Amount Recognition (CAR/LAR) functionality

- ✔ **Eliminates security risks** by removing the need to physically transport checks to the bank

ARC, POP, BOC
Check 21 and
Image Exchange

RDM Corporation ™

itms WebClient

Features

Setup

- ✔ Easy Client deployment with no software to install
- ✔ Rapid client setup without additional local configuration
- ✔ Seamless integration with the ITMS Host enables one-time setup of all roles, entitlements, and passwords system-wide
- ✔ Multi-version support gives you the flexibility to upgrade when it is convenient for you
- ✔ Extended scanner support

Operations

- ✔ Intuitive, user friendly, browser-based interface enables quick and efficient deposit creation and effective workflow organization
- ✔ Activity-based modules for flexible workflow management across multiple workstations
- ✔ BOC, POP, ARC, Check 21 and Image Exchange processing modes to allow for all possible types of transactions
- ✔ Remittance and check data support for maximum transaction flexibility
- ✔ Single feed and batch scanning modes support to allow for all possible scanning operations

Enhancements

- ✔ High processing volume abilities of up to 1,500 transactions a day per scanning workstation
- ✔ Advanced Image Quality Assurance (IQA) functionality ensures that images are suitable for automated processing and settlement
- ✔ Superior CAR/LAR reading functionality minimizes manual data keying, correction and balancing
- ✔ Payer Lookup for easier implementation and advanced image search functionality
- ✔ Advanced OCR field recognition, parsing and validation for most efficient coupon data extraction and exploitation
- ✔ Numerous risk assessment tools including Duplicate Detection, Stops and Configurable Rules
- ✔ PDF, CSV and XML file exports for flexible data presentment and reporting
- ✔ Sophisticated image viewing tools for easy to find and detailed data searching

Specifications

Minimum Hardware Requirements

500 MHz P3 Processor, 256 MB Memory, 20-50 MB HD storage space, 1024 x 768 Screen Resolution, Keyboard, Mouse, System printer to print customer or merchant receipts, batch lists, and transaction details.

Minimum Software Requirements

Windows Operating System (Standard or Professional, North American Version) or Windows XP SP1 or SP2 (Home or Professional, North American Version). Internet Explorer 6.0 or Internet Explorer 7.0

Internet Bandwidth

To scan items with the WebClient, RDM recommends an Internet connection upload speed of at least 500 kbps.

Component Installation Requirements

The ITMS WebClient requires ActiveX components to be installed on every Item Workstation including Scanner Control Manager, Scanner Drivers and Altova Control.

Scanner Support

The ITMS WebClient version 1.1 supports RDM's EC7000i®; Epson's CaptureOne™; Digital Check's TellerScan TS210e, TS215, TS220e, TS230-65 and TS230-100; Panini's MyVisionX 30, 60 and 90 scanners.

Scanner throughput using the ITMS WebClient may be less then the scanner's throughput rated.
