

MOON-VENUS TRANSIT

The purpose of this study is to illustrate a rare Transit of Venus occulted by the Moon. The famous Transit of Venus in 2012 was across the Sun. This Transit of Venus is eclipsed by the Moon in the constellation of Virgo. One observation is that the main planets are in the vicinity of Virgo, in which the Transit occurs and next to Scorpio and Ophiuchus. What is noticeable about this event on December 7, 2015 is that it corresponds to the Holy Feast of Hanukkah. The actual start date is at sunset on December 6th but the actual Transit of Venus by the Moon approximately will last the whole day on the 7th. Another unique observation is that if one adds the ominous 666 numerical coefficient number to the Hanukkah date of the Moon-Venus Transit, the end date corresponds to the end of Sukkot on October 3, 2017. This date is also 13 after the other ominous 'Sign' that many are attributing it to the Revelation 12 Great Sign in the Heavens that is the Virgin engaged in the celestial struggle between the Seed of the Woman and Lucifer the 'Shining Serpent'. The context of this Great Sign is that of a travail, a birthing, a war, a birth and a rapture. The imagery of the December 7, 2015 Moon-Venus Transit does have the iconographic symbols of what many in the End Times studies see as the elements that suggest the coming Rapture of the Bride by the Groom that is scheduled to occur at some point in time.

There is the 'coincidence' of the constellation Virgo where the Transit occurs. Another unique observation is that there is a mathematical relationship amongst the 3 main planets associated with the Moon-Venus Transit. All these 3 planets are juxtaposed in Virgo also. The approximate spacing between Jupiter, Mars and the Moon-Venus Transit is in phi ratio. This is just another nuance of the synchronicity and marvel of YHWH's Creation using sacred geometry and clockwork. Thus the conjunction of the Bright and Morning Star, Jesus with the Bride, the Moon is just another foreshadowing of how the Cosmos has the pre-established signatures of the Creator and perhaps of the Rapture of the Bride by the Groom to come at some point in time.

THE BRIDE
The Coming Rapture
A 'picture' of what is to come

Thus the conjunction of the Bright and Morning Star, Jesus with the Bride, the Moon is just another foreshadowing of how the Cosmos has the pre-established signatures of the Creator.

Based on the reverse law of opposites adhered by the Luciferians, this Moon-Venus Transit alludes also to the Islamic motif of the Star and Crescent. This could very well be a sign or taken to be a sign or omen. It could also be attributed to an advance of the Luciferian Agenda and no doubt utilizing more onslaughts and waves of Islamic terrorism unleashed against the world and specifically against Christians and Jews.

THE GROOM
Bright and Morning Star

The Moon has always been considered the consort of the Sun, in terms of reflected glory as the Bride of Christ reflects off the Son of GOD. Then the planet Venus is alluded to Christ Jesus Himself as one of the divine titles Jesus gave Himself.

Perhaps it is a depiction of the great showdown between Islam and Judaism. Will a coming war breakout between Israel and the Muslims as signaled by this omen? It does portray the configuration of the Star and Crescent, the symbol Muslim god Allah against the day of Hanukkah, the Festival of Lights of the GOD of the Universe YHWH. This study, in no way is asserting that the Rapture is to occur on this date but that the Heavens are continuing to declare the Glory of the LORD YHWH and that His time-table is going according to plan.
