

Important Notice: 2025 Price Adjustment Effective January 1

To Our Valued Customers,

For 25 years, Quality Analytical Laboratories (QAL) has been committed to providing the highest level of analytical services and customer support. During this time, we have only raised prices when it was absolutely necessary to maintain the quality, reliability, and accuracy you depend on. As we look ahead to 2025, we must make an adjustment to our pricing structure.

Beginning **January 1, 2025**, prices for standard testing services will increase by 3 – 5%. This annual adjustment ensures we can continue delivering the quality, speed, and consistency you expect, while addressing rising costs in laboratory operations, raw materials, and staffing.

We encourage you to request a quote before sending samples if you are unsure of the cost, as this will provide clarity and help with planning.

We understand that price changes are never easy, and this decision was not made lightly. Thank you for your understanding and for trusting QAL as your analytical partner.

For questions, please feel free to contact us at info@qal.net or **850-872-9595**.

Thank you for your continued partnership. We look forward to working with you in the coming year.
