## Resident Service & Care Plans

Many older adults have acute & chronic illnesses. Our approach to our residents' clinical care is designed to identify & accommodate these needs. An initial evaluation begins prior to and upon admission that identifies health issues or risks & allows for the best care plan possible based on the resident's individual needs. This plan may also include rehabilitation or therapy services as needed.

Each of our facilities has licensed & certified staff available 24-hours a day to help with all aspects of resident care, including:

- Medical Director on Staff
- RN (Registered Nurse)
- LPN (Licensed Practical Nurse)
- Phlebotomist
- Med-Tech's (Medication Technicians)
- CNA's (Certified Nursing Assistants)
- PCA's (Certified Personal Care Asst)
- Certified Dietary Managers
- Certified Activities Coordinator

The well trained employees work closely with physicians to fulfill the specific needs of each resident. Clinical support staff includes:

- Therapists
- Lab technicians
- Podiatrists (nail care)
- Pharmacist (quarterly medication review)

This type of support helps to ensure that residents can remain in their community while accessing the care they need to live comfortably, securely, & with dignity. Combined with the activities program providing socialization, games, outings, crafts, & fun the residents remain engaged and active. Remain engaged while receiving the extra care they need.
