

Connections

Guess the words defined by the clues below. The answers vary in length from 3 to 8 letters long and of these, 3 are capitalized, 2 are acronyms, 2 are foreign and 2 are archaic.

This puzzle consists of 4 connected grids of 30 squares each; 2 are a 5x6 shape and the other 2 are 6x5. The grid clues are presented in 4 groups, each group is for one of the 4 grids but it the solvers responsibility to determine which group is for which grid.

For each grouping, the first answer will start somewhere in the first row of the appropriate grid and then the other clues will be entered in order starting with the across entries. When you reach the rightmost square of a row, continue at the first square of the next row. When the bottom right corner is reached, the next letter will be in the top left and the words will proceed down the columns. Finally, the end letters of the last down clue will fill in the top row as needed.

The grids are connected by eight 5 letter 'connector' words clued in alphabetical order below. When the puzzle is completed correctly the 8 shaded squares from those 'connectors', reading from top to bottom and left to right will provide an appropriate title for the puzzle.

1. I take some alum powder
 2. Assigning to initially and enquiring!
 3. The jerk is a heretic, but not here
