We feature state of the art modern equipment that provides “Steam Carpet Cleaning” or “Hot Water Extraction”. Hot, high pressure cleaning solution is injected into the carpet then immediately extracted out along with dirt, allergens, the cleaning solution, and 95% of the moisture. It’s the cleaning method most recommended by carpet manufacturers. We use DRI-EAZ AirPath Fans for incredibly fast drying. Many carpets are dry within a few hours! We guarantee to provide you with the absolute best cleaning results, using modern equipment, and the steam carpet cleaning process WITHOUT leaving your carpets soaking wet.
