

Rel. Mat.:38

Positioning For:

SUITABILITY RATINGS

KEY ENVIRONMENTS

High Yield Environment	Highly Suitable
Low Yield Environment	Suitable
Fields at High Risk of Sclerotinia	Suitable
Minimum/No-Till Environments	Insufficient Data

SUITABILITY

Late Harvest	Suitable
DuPont(TM) ExpressSun(TM) Herbicide System	Highly Suitable
Hulling Market	Suitable

SOILS

Early Planting/Cold Soils	Manage Appropriately
---------------------------	----------------------

MANAGEMENT COMMENTS

- Good choice for fields where improved downy mildew resistance is needed.
- This hybrid contains the SU7 DuPont ExpressSun gene developed by DuPont. The DuPont ExpressSun gene provides resistance to DuPont Express® brand herbicide with TotalSol soluble granules. **WARNING:** The DuPont ExpressSun gene will safeguard this hybrid **ONLY** against applications of DuPont Express® brand herbicide, when applied at labeled rates. The DuPont ExpressSun gene **WILL NOT** safeguard this hybrid against applications of other herbicides which require a different herbicide resistance gene. Always read and follow herbicide label instructions prior to use. **ACCIDENTAL APPLICATIONS OF INCOMPATIBLE HERBICIDES TO THIS HYBRID COULD RESULT IN TOTAL CROP LOSS.**

CHARACTERISTIC SCORES

Downy Mildew Race Resist.	1-4

TRAIT SCORE RATINGS: 9 = Excellent; 1 = Poor. Blank = Insufficient Data.

PIONEER® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents. ®, TM, SM Trademarks and service marks of DuPont, Pioneer or their respective owners. © 2016 PHII. 11FA Updated as of 09/2016

HERBICIDE SYSTEM: Pioneer® brand sunflower hybrids with the DuPont(TM) ExpressSun® trait for tolerance to DuPont(TM) EXPRESS® herbicide with TotalSol® soluble granules. This unique sunflower system from DuPont and Pioneer is designed to maximize weed control in sunflower crops, enhancing ease of production and yield. This system provides improved weed control over conventional hybrids with traditional herbicides. For the best results, always use Express® herbicide with TotalSol® soluble granules with the ExpressSun® trait system. DuPont(TM), ExpressSun®, EXPRESS® and TotalSol® are trademarks or registered trademarks of DuPont or its affiliates.

HERBICIDE SYSTEM: The DuPont(TM) ExpressSun® gene provides resistance to Tribenuron methyl. **WARNING:** The DuPont ExpressSun gene will safeguard this hybrid **ONLY** against applications of Tribenuron methyl, when applied at labeled rates. The DuPont ExpressSun gene **WILL NOT** safeguard this hybrid against applications of other herbicides which require a different herbicide resistance gene. Always read and follow herbicide label instructions prior to use. **APPLICATIONS OF INCOMPATIBLE HERBICIDES TO THIS HYBRID COULD RESULT IN TOTAL CROP LOSS.** DuPont(TM) and ExpressSun® are trademarks or registered trademarks of DuPont or its affiliates.

IMPORTANT: Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by DuPont Pioneer Research Managers. Scores are based on period-of-years testing through 2015 harvest and were the latest available at time of printing. Some scores may change after 2015 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com/products or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.
