Turf Formula

Nutrient
 "Accelerator"

University Tested
 and Scientifically
 Proven to :

- * Increase Nutrient Absorption up to 60%
- * Reduce Fertilizer & Chemical Rates by 50%
- * Reduce Watering Requirements
- * Improved Root Growth and Penetration
- * Reduce Thatch Buildup & Suppress Disease
- * Improved Plant Tolerance & Recovery

Microbial Test Results

- Sample 1. Non-treated soil sample checked for microbial activity.
 Results: 31,800,000 SPC/GM
- Sample 2. Same soil as sample #1 except treated with Turf Formula 72 hours prior to analyzing for microbial activity.
 Results: 600,000,000 SPC/GM
- Sample 3. The Turf Formula stimulated a 2000% increase in microbial activity within 72 hours!!

Tests conducted by: Morning Star Laboratories Inc. • Moorpark, California

Turf Formula
Bio-Stimulant

Tees and Greens

6 oz. per 1,000 sq. ft. every 30 days throughout entire growing season. Use half rates every 15-days during stressful conditions.

Fairways and Rough

1 quart per acre every 30-days throughout entire growing season. Use half rates every fifteen days during stressful conditions.

Sport Fields

1 quart per acre every 30-days throughout entire growing season. Use half rates every fifteen days during stressful conditions.

Lawn Care

Apply 2 oz. per 1,000 sq. ft. every 4-6 weeks during the growing season.
