COMPANY C PULLS RECON

In preparation for their upcoming project, Charlie Company, 39th Engineer Battalion, completed a reconnaissance of Route 518, west of Quang Ngai recently. After one delay due to bad weather, the recon element was dropped off at Fire Support Base 411 where they linked up with their Infantry security. They then set out on foot to walk the nine kilometers back to Quang Ngai Airport. There, a reactionary force was standing by, as were the return vehicles.

The project is to upgrade Route 518 into a single lane all weather road with turnouts every 500 meters. The project should require about two months to complete.

CPT. Larry Warren
