9:30 a.m.	Chickens - From Pasture To Plate	Successful Seed Saving
10:30 a.m.	Tried and True - Hardy Trees And Shrubs For Wyoming	Strawberries - From Starts To Finish
11:30 a.m.	Backyard Composting	Making Fruit Wines
1:00 p.m.	Enhancing Your Vegetable Production	Marvelous Meals In The Mountains
2:00 p.m.	Gardening Without A Garden	Oh Deer! I Have A Problem

For more information call Popo Agie Conservation District at 332-3114

Class Location — The Commons

9:30 am	Chickens - From Pasture to Plate	Hudson Hill, UW Extension
10:30 am	Tried And True - Hardy Trees And Shrubs For Wyoming	Mark Hughes, Wyoming State Forestry
11:30 am	Backyard Composting	Caitlin Younquist, UW Extension
1:00 pm	Enhancing Your Vegetable Production	Karen Mott, Spear S Produce
2:00 pm	Gardening Without A Garden	Missy White, Sprout's Greenhouse
All sessions run for 45 minutes		

Chickens - From Pasture To Plate

Hudson will discuss raising chickens on pasture and in the backyard. Come learn about chick care, nutrition, production, and free-range management for both layers and meat birds.

Tried And True - Hardy Trees And Shrubs For Wyoming

Mark will highlight tree species of the historic High Plains Horticultural Research Station as well as dozens of native and adapted trees that have performed well in Wyoming's challenging climate.

Backyard Composting

Composting is a great way to turn waste into a resource for building healthy garden soils. In this class, Caitlin will teach the steps for building a great compost pile, how to keep those hard-working microbes happy, and how compost feeds the soil.

Enhancing Your Vegetable Production

Work smarter, not harder - let the soil work for you! Karen is a commercial vegetable grower from Lander. She will cover how to increase production from the ground up.

Gardening Without A Garden

No garden plot? No problem! Container gardening is an easy and convenient way to have fresh food. Missy will help you with container selection, soil preparation, and planting in this workshop. If flowers are your thing, the same principles apply.

Class Location — Auditorium

9:30 am	Successful Seed Saving	Mae Smith, UW Extension
10:30 am	Strawberries - From Starts to Finish	Jeff Edwards, UW Extension
11:30 am	Making Fruit Wines	Griff Sprout, Sprout's Greenhouse
1:00 pm	Marvelous Meals In The Mountains	Kevin Redmon, NOLS
2:00 pm	Oh Deer! I Have A Problem	Griff Sprout, Sprout's Greenhouse
All sessions run for 45 minutes		

Successful Seed Saving

Do you have a friend that grew the best tomatoes you've ever had? Would you like to be able to save the seeds so you can grow those tomatoes in your own garden? Mae will explain how to successfully save those seeds.

Strawberries - From Starts to Finish

Come learn what it takes to grow strawberries in Wyoming. Jeff will cover the trials and tribulations of growing June-bearing strawberries on a small commercial scale.

Making Fruit Wines

Have you ever wanted to make your own wine? Wine doesn't have to be made from grapes; how about peaches or raspberries? Griff will cover all the steps and supplies required to make your own batch of wine with the fruit of your choice.

Marvelous Meals In The Mountains

Want to bake cinnamon rolls over a camp stove, or make "cowboy coffee" that actually tastes good? Kevin will discuss backcountry nutrition, rationing, stove use, and bear awareness. Come with questions and leave with recipes. We'll even have samples to try.

Oh Deer! I Have A Problem

Are deer an issue in your yard and garden? Griff will discuss techniques for management of deer using physical deterrents, chemical deterrents, and resistant plants.
