Barn Owl Nest Box Plans

The Barn Owl is perhaps the most widespread of all land birds, found on every continent and on many island groups. Barn Owls hunt at night in open or semi-open country, quartering low over marshes, grasslands, and fields. By day, Barn Owls roost in hollow trees, crevices in cliffs, and in buildings such as barns, abandoned buildings, and church towers. Below are two versions of Barn Owl nest boxes.
Barn Owl Nest Box Plans

BOX TYPE A

12'' x 16'' x 40''
SIDE  SIDE
