Chuck, it was great seeing you last weekend. I wanted to just take a minute to share with you how blown away Christina and I were with your new project. It amaze me sometimes when you see someone take standard construction materials and mixed them in a way that they create a product 10x superior to anything on the market today. First off, your foam is amazing, I don't think there's an application you can't use it on, (Homes, Roofs, Trailers, Boats, ect). Secondly, I truly believe that your modular pre-fab systems will one day change the way governments, both local and abroad look at construction and disaster relief. Congrats and Best of Luck , we wish you nothing but the greatest success. Please send our best to Sylvia.

Kenny
