

Pesticide Calibration & Safety Workshop

Clemson Extension Agents and Specialists are offering a Pesticide Sprayer/Spreader Calibration and Safety Workshop in Easley on March 31, 2017. This daylong hands-on workshop will teach proper calibration techniques for a variety of common pesticide and fertilizer application equipment, as well as pest and weed identification, and IPM practices. Registration will include lunch, training materials, and six (6) pesticide recertification credits (3 each of core and category 3 credits) for SC applicators.

Training is limited to the first 50 paid registrants.

Register Online: <http://ow.ly/CYvi308R6vf>

Preregistration is required by Tuesday, March 28.

For additional information or to register:
