

Letters to the Editor, Woodinville Weekly, March 2, 2015

The idea for a new sports complex where the Wellington Hills Golf Course used to be is not something I am looking forward to, and neither are other local residents. The plans to create this will cause unnecessary noise and pollution.

The creation of this new complex needs to be stopped. Other locals, not just I, do not want to see the increase in lighting during off hours when people are just waking up and going to bed, and the noise from sports and transportation that are associated with the creation of such a sports complex. Also, don't get confused; creating this complex will take plenty of noisy machinery to make the fields and parking lots. No one wants to see dump trucks taking over their roads anytime soon and tearing up the old golf course right next to so many of our homes.

Please do not continue with your plans to create this sports complex. It will cause residents to resent where they live now and quite possibly lower their property values. This field represents a corporate need to create more profit through the renting out of its services. I do not want to see this happen. There are already enough sports complexes and fields in Woodinville. We do not need another. It is just going to upset the environment and locals in the area. Stop the creating of a Safeco Field-sized sports park in the middle of a rural neighborhood!

M.W.
