

May 21, 2021

Good afternoon from Midway Nursing Home!

Midway Nursing Home remains **COVID FREE**. Weekly testing of residents and twice weekly testing of staff continues.

Resident visits are going wonderfully, and the residents are elated to see their loved ones!

Visiting is by appointment only and we follow all CDC & NYSDOH guidelines for infection prevention including screening, testing monitoring & sanitizing the visiting area. Visiting is outdoors, weather permitting, or in our visiting area on the 1<sup>st</sup> floor.

One hour visiting sessions beginning at 10:30 AM & 1:30 PM are scheduled according to unit, Monday through Friday. Appointments are on a first come first serve basis as space is limited to allow for privacy, social distancing and maintaining appropriate infection control measures during and between visit sessions. To schedule or cancel your visit, please call Connie Leone on x307.

Due to space limitations, no more than 2 visitors (18 or older) per resident can be scheduled. All visitors are screened and offered a rapid COVID test upon arrival. Please arrive 20 minutes prior to your scheduled visit to allow time for screening and testing so that you can enjoy your entire time with your loved one. Masks must always be worn while on Midway's premises regardless of vaccination status and social distancing maintained.

Virtual and Facetime visits are available every day. Please speak to someone in Recreation or Social Services to schedule a virtual/Facetime visit.

Although restrictions have been lifted, COVID-19 remains and is of particular concern for nursing home residents. Please do all you can to limit your exposure and consider being vaccinated if you have not done so already.

See you soon! 😊
