Laurie:

Here one of the six or seven emails for the Baycrest website.

Thanks
Kevin

Subject: Two-Wire Single Controller Updated

Dear Baycrest Homeowners,

The two-wire single irrigation controller installation is underway. Greenscapes marked 30 driveways today (April 26) with orange arrows. Starting on Monday, May 3, the jack and bore drillers will bore under these 30 driveways so that Greenscapes can connect the wiring in a continuous loop around Baycrest. The paint is temporary and will wash away after several good rains.

Installation should take 8 to 10 weeks to complete after which time the sod replacement will take place for those homeowners who have signed up for new sod. Once the single controller is up and running all 91 irrigation boxes will be removed and all watering times/changeovers will be handled through the single controller program.

Here are the 30 driveways:

25220 25230 25240
25241 25250 25251
25257 25259 25261
25270 25279 25280
25281 25283 25290
25300 25301 25340
25350 25357 25360
25370 25383 25390
25400 25410 25420
25430* 25440 25450

*Jack and Bore under the street behind 25419 directly to 25430 to connect the inner island and the outer circle.

Please refer any questions to Gary Toop (Greenscapes) or Kevin Hara. Periodic updates will be sent out to keep all homeowners informed on timing and requests.
