

DPZYXQVSHCWJF

Guess the words defined by the following clues. The answers vary in length from three to seven letters long and of these, three are capitalized, one is hyphenated and one is a common acronym. The punctuation in the clues may or may not help the solver.

Enter the answers in the grid one after the other starting in the top left corner and in the same order as the clues. Across words that don't end at the rightmost square of the row will continue on the leftmost square of the next row. Similarly, down words that do not end in the bottom square will continue at the top of the next column.

For thirteen squares, the letters from the across and intersecting down words are different. In these cases enter both letters in the square. When the puzzle is properly completed, each letter of the alphabet will be used exactly once in these thirteen squares. You will then be able to use the letter associations from these squares to decode the puzzle title and produce a description of something I relish as a cryptic puzzle compiler.

F	O	R	T	U	NJ	E	A	R	E	D
A	WI	N	E	N	E	R	G	Y	CK	O
