

Whisenhunt Farms

Stud Service

The following are the terms for stud services provided by Whisenhunt Farms.

A negative Brucellosis test within 30 days of breeding is required.

If the bitch will be staying in my kennel for a period of time a boarding waiver will apply and will be signed as well. The bitch must be up to date on all vaccines and rabies and dewormed as well as a Bordetella vaccine before being boarded. If the bitch is in poor condition when brought to my stud or any other signs of poor health the mating will be denied.

If you choose to breed to a stud that is a carrier of any specific hereditary disease your bitch must be tested clear by genetic testing.

Stud owner reserves the choice of 1st pick of the litter or a stud fee. Stud fees are set at the current price of pups for the stud chosen.

__\$ _____

Breeding certificate will be signed for ABCA at the time of mating and when fees are paid. AKC paperwork will have to be done later.

Stud fees are payable at the time of mating. If stud owner chooses a choice pup then the paperwork will be held until the choice pup has been recieved.

Litter guarantees. Guarantee of 3 live pups for the stud fee paid. Unfortunately a bitch can require complicated and expensive procedures during whelping as well as complications and expenses within the litter. These are not the responsibility of the stud owner and are of no affect on the price of stud fee. If less than 3 live pups are born a repeat mating at no additional charge will be honored.
