John T. Reid, Mayor

### Remarks...

Mr. Bubba Scott, Executive Secretary,  
Alabama High School Athletic Association

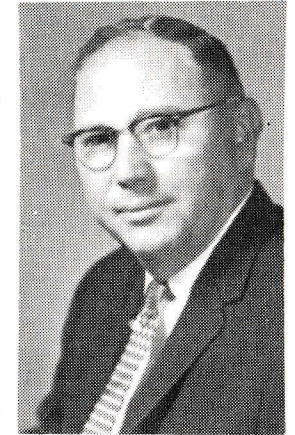

### Adjournment...

Mr. Ray Collins, Principal

**OCTOBER 22, 1971**

## SUPERINTENDENT'S MESSAGE

The completion of this fine stadium represents many years of dedicated planning and searching for financial resources with which to build. A project of this nature and magnitude could never be accomplished without the willingness and cooperation of many people. To all those people who have shown this spirit of cooperation, the Scottsboro City Board of Education is grateful, and may this stadium always be a monument to their efforts.

Dr. Thurston T. Nelson  
Superintendent  
Scottsboro City Board of  
Education

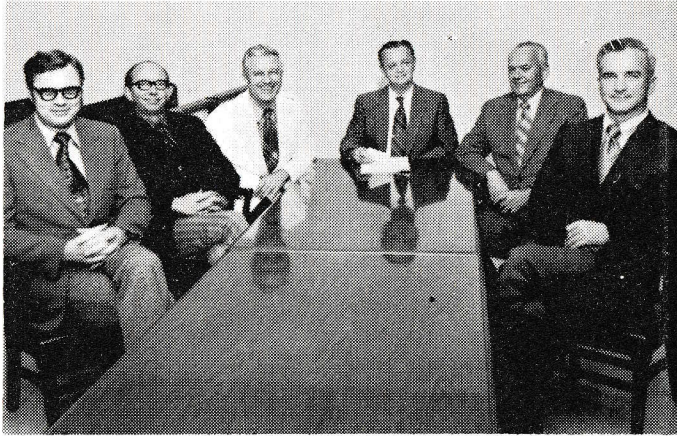

The physical facilities, here created, will greatly enhance the educational program of this city. It is here that hundreds of our finest young athletes will assemble to be evaluated by thousands of spectators. It is here that they shall learn the glory of victory and the agony of defeat. It is here that they shall learn that anything worth having requires hours of hard work and discipline. It is here that hundreds of our finest young men and women who participate in our band program will assemble to be evaluated by thousands of spectators.

May this structure and the program which it serves, enable these young men and women to develop to the optimum the intellectual and physical potential residing within them. This is the only justification for its existence.

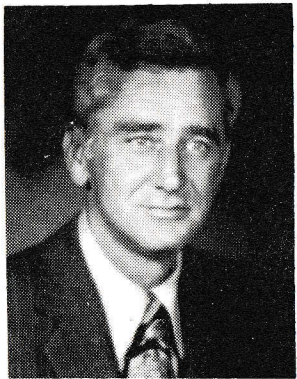

Dr. Thurston Nelson, Superintendent  
Scottsboro City Schools

## ARCHITECTURAL DATA

Trammell Stadium was designed to provide a functional facility to serve the athletic and physical education programs of Scottsboro High School. Emphasis was on both minimum maintenance and economy.

The main structure is pre-stressed precast concrete tee slabs, supported on a skeleton frame of structural steel bearing on reinforced concrete caisson foundations.

The press box is enclosed with corrugated protected metal.

The seating is of reinforced molded plastic.

The dressing room facilities utilize concrete block walls, precast concrete double tee roof structure, with carpet, ceramic tile, and exposed concrete floors, lighting is incandescent and fluorescent. All dressing rooms and public areas are air conditioned for year round use.

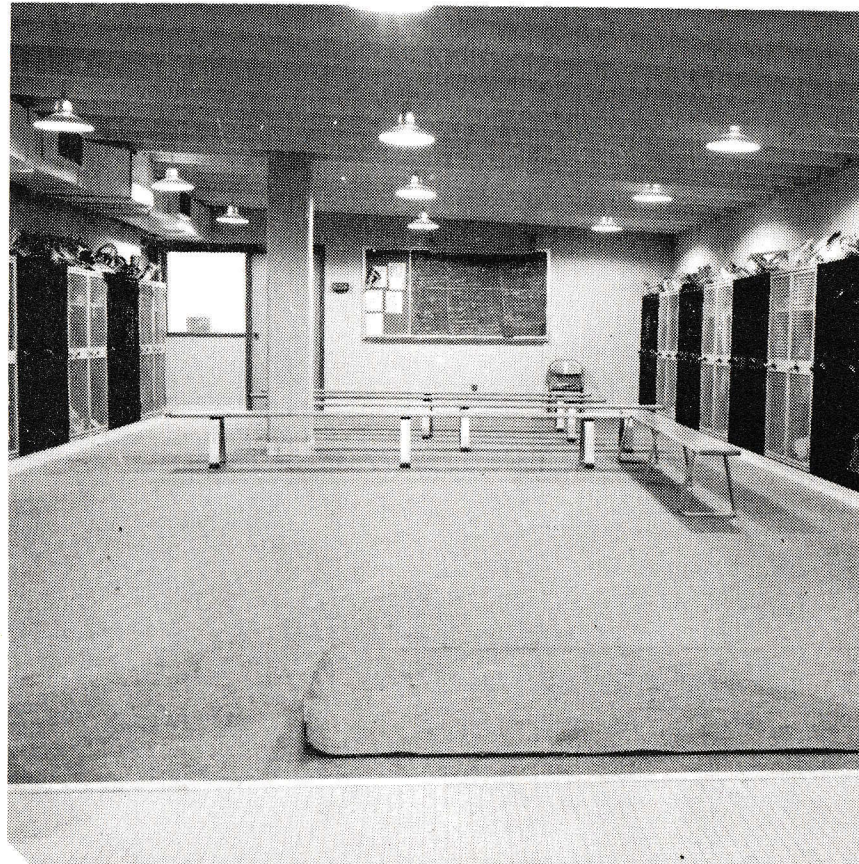

The excellent field lighting system was installed by and will be maintained by the City Electric Board.

<b>LOCATION</b>	<b>SCOTTSBORO, ALA.</b>
Seating Capacity	6,000
Construction Cost	\$275,000
Contract Awarded	Sept. 30, 1970
