Sue is a great instructor! She provided training for my private pilot certificate and did an excellent job. As I am in my mid-50s and my pilot time is getting shorter every day, I needed the best instructor that I could find. Definitely consider Sue for any of your aviation training needs.

My training adventure began a year and a half ago. I would have completed training and the check ride sooner if it wasn't for my numerous trip interruptions. I also had some learning challenges due to my decades as a career engineer. As Sue once pointed out to me, "if you want to learn about yourself, go learn to fly". Well, I definitely learned about my weaknesses and strengths as they relate to learning to fly. Sue provided focused lessons to overcome my weaknesses and reinforce my strengths, always with an eye toward safety. You will go well prepared for your check ride--Sue wouldn't have it any other way. I passed mine with "flying" colors and I'm sure with Sue's training, you would too.
