

Base Coat Adhesive

A high performance polymer modified base coat for use with EIFS and stucco systems. Used as an adhesive for bonding (EPS) expanded polystyrene. It is also used as a base coat for embedding fiberglass mesh over the EPS board and approved substrates. Depending on substance conditions and application methods, approximate coverage is:

Adhesive: Using a notch trowel method, 50-70 sq ft per 50lbs.

Base Coat: Using for embedding fiberglass mesh, 90-100 sq ft per 50lbs.

| ITEM | Chemicals | COLOR | SIZE | BAGS/PALLET |
|-------------|------------------|--------------|-------------|--------------------|
| BCA050 | 50kg/ton | Gray | 50 lbs | 56 |
| BCA075 | 75kg/ton | Gray | 50 lbs | 56 |
| BCA100 | 100kg/ton | Gray | 50 lbs | 56 |
