ETCHED BLACK GRANITE INSERTS

Hand etched portrait or design artwork looks best on polished black granite. You can add a polished black granite insert panel to any color monument or marker. The black granite insert panel is attached flush to the face of the monument or marker with monument grade adhesive. The black granite insert panel is then edge grouted with silicone sealer for a perfectly finished look that will last for generations. The portrait or design is then hand etched on the black granite insert panel. **Hand etching is available on these insert shapes, custom shapes are**
