2020 Apple Valley Hockey Camp

This clinic utilizes small area games which are designed to develop individual skills. These games promote creativity and allow players to safely experiment with different playing styles.

Small area games increase puck touches and requires players to work in tight situations while moving the puck quickly. This will develop a player's quick thinking skills, hockey sense, and is a more effective way of training a player at any level.

This clinic also focuses on skating, skating technique and balance. The coaching staff believes it is important to be able to skate efficiently and effectively to be a successful ice hockey player.
