Attendees will learn about best practice approaches to teaching, re-training, and recordkeeping. Even if you’ve attended before, there are new topics for both behind-the-wheel and in-classroom training. The behind-the-wheel training track includes reference point lessons; backing; and an in-depth, hands-on workshop for special needs issues (e.g., emergency evacuations, manual lift guidelines, and unique wheel chair securement scenarios). The classroom presentations include advanced paperwork, in-service best practices, and emergency response for transportation.
