

## **PRODUCT DATA SHEET**

### **BREAKTHRU – SULFURIC ACID DRAIN OPENER**

#### **DESCRIPTION**

This is a liquid, virgin-acid drain and pipe conditioner that cleans dirt in drains and waste pipes. It eliminates stoppages quickly and easily and restores the minimum safe diameter (MSD) in drain lines by removing soap, grease and soft scale build-up.

Because it is heavier than water, it goes down through the water to the point of the obstruction. It contains an inhibitor that slows down the reaction so that surface “flashback” is eliminated when used as directed. It also contains an inhibitor that prevents corrosion and joint damage on metal and plastic surfaces. Each bottle is individually plastic wrapped for safety in storage and shipment.

By using this product in a regularly scheduled preventative maintenance program, stoppages will be eliminated and drains will remain free flowing.

#### **FEATURES**

- **ECONOMICAL**
- **100% ACTIVE**
- **READY TO USE**
- **SAFETY PACKAGING**
- **WORKS FAST AND EASILY**
- **CONSISTS OF PURE VIRGIN-ACID**

#### **USE AND DIRECTIONS**

Removes excess water from drains, sinks or toilets. Pour slowly directly into drain. Use about 4 oz. for sink drains. Allow to stand five minutes, add a cup of water, let stand five minutes and flush. For toilets, add 16 oz.. Wait five minutes, add 2 quarts water. Wait fifteen minutes and flush. Do not use on stainless steel sinks.
