Pastor Ari

Pastor Ari has been ministering on the Amazon for years. With the Amazon River over 4000 miles long there are many branches off the Amazon with islands everywhere to minister and share the Word of God. Everywhere people wanted to hear more of the Word of God. HIS word goes before us as we shared. God is so good and has more coming into eternity.

Doc, Lady, nurse Karen

On one island we finished clinic early and I asked our curator who was the poorest family. She said the poorest and meanest lived in a house in the water. She took us to the edge of the island and yelled. Finally the lady answered, got in her boat, and paddled to the island. When she arrived I told her through the interpreter, that I wanted to take her to a store. The owner of the grocery store, with her husband, had just received Jesus into their

Grocery store owner

hearts that morning. I grabbed her hand to be sure she would not run away from us. We went to the store and asked her to get what she wanted. She was surprised and filled a box and stopped. The owner gave us the total for me to pay. Then the owner said, wait you need to have Jesus. We shared as she received Jesus in her heart. When we finished she said "I am a blessed women" and we carried the groceries to her boat.

Flood yet

What else do you want?

The blessed woman

A mother's heart

One night at dark after we were back on the boat they called for me. A group in their boat boarded our boat. This woman was in their boat with family working and her 3 year old was crawling around and went over the edge. The current is very fast and she could not find her child. They wanted help to sleep after such a tragedy. We gave meds and prayed for them. Many little ones are lost to the Amazon, snakes, etc.

House on the water

The houses are very simple and flood yearly, most of the time. The evangelistic team went door to door and were impressed at the hunger for the Word of God and so many receiving Jesus in their heart for eternity. The only religious input is when the priest comes 2-3 times per year and they have to pay his way and a stipend. I was impressed at how happy they were at the slowed down pace of life. This is a lesson we need to learn to be able to enjoy.

"Island Life"

One source of water for all, and 2 cups
