

# Diamond Clarity

 <b>F</b>	Shows no blemishes or inclusions when examined by a skilled observer under 10x magnification.
 <b>IF</b>	Shows no inclusions and only minor blemishes to the skilled observer under 10x magnification.
 <b>VVS<sub>1</sub></b>	Contains minute inclusions that are extremely difficult for a skilled observer to see under 10x magnification.
 <b>VVS<sub>2</sub></b>	Contains minute inclusions that are very difficult for a skilled observer to see under 10x magnification.
 <b>VS<sub>1</sub></b>	Contains minor inclusions that are difficult for a skilled observer to see under 10x magnification.
 <b>VS<sub>2</sub></b>	Contains inclusions that are somewhat easy for skilled observer to see under 10x magnification but invisible to the untrained eye.
 <b>SI<sub>1</sub></b>	Contains noticeable inclusions that are easy for a skilled observer to see under 10x magnification but still invisible to the unaided eye.
 <b>SI<sub>2</sub></b>	Contains inclusions that are very easy for a skilled observer to see under 10x magnification. Some characteristics may be seen with the unaided eye
 <b>I<sub>1</sub></b>	Contains inclusions that are obvious to the skilled observer under 10x magnification. These inclusions are usually quite visible to the unaided eye.
 <b>I<sub>2</sub></b>	Contains inclusions that are easily visible to the unaided eye.
 <b>I<sub>3</sub></b>	Contains inclusions that are extremely easy to see with the unaided eye and may affect durability.
