

Nylatron® GSM Composite Pulley

- Up to 800% more cable life
- Non-magnetic
- Electrically non-conductive
- Infused with molybdenum disulphide (MoS₂) to enhance its load bearing capabilities
- Utilizes two 6213 deep groove ball bearings with a rated speed of 3600 RPM.
- Dynamic load rating of 55 900 N (14 000 Lbs.) on single bearing. 111 800 N (28 000 Lbs.) on two bearings for total load carrying capability
- Center pulley insert is machined from billet 6061 T6 511 Aircraft Aluminum
- Complete with four mounted magnets at the pulley to achieve a higher resolution of depth and line speed calculation

Complete Pulley with all components \$3000.00 Cdn
(with out load pin as shown)
