

# System # 5 Pipe Markers™: High Temp Stick On Labels

## Stick On Polyester Markers

### Self-Adhesive Polyester System #5 Markers.

Are used to identify piping systems in industrial environments that are expected to reach higher temperatures or high exposure to chemicals. Markers are constructed using a 2 mil polyester with a 1 mil polyester overlam. Polyester offers superior temperature, chemical and UV resistance compared to vinyl markers. Markers are supplied with aggressive acrylic adhesive with an extra heavy coating to ensure adhesion to a variety of pipe surfaces. Clean, Dry Surface and 50° F required for installation.

- Temp. Range: -40° to 248° F
- Chemical Resistant
- Abrasion Resistant
- UV Resistant
- No Minimums On Stock Markers
- Same Day Shipping Available
- No custom set up charge
- Markers and arrows are sold individually and separately.
