

OUR PLAN-ON A PAGE

KEY BUSINESS PLAN OBJECTIVES

CHL is a healthcare solution based business established to provide cost effective community pharmacy services that support improved outcomes for the GM community.

We will support our members to provide services with improved patient outcomes. All surplus profits will be re-invested back into GM patient healthcare.

Working in collaboration with pharmacy contractors and other healthcare providers. To do this the board has determined the following **3 key priorities**: -

1. UNDERSTANDING THE NEEDS OF GREATER MANCHESTER DEVOLUTION (GMCA HSC).

Devolution Manchester is still formulating plans to work collaboratively to improve the health of the population. We will develop key links with stakeholders and decision makers in GM Healthcare.

“Devo Manc” is looking for more sensible, joined up and efficient ways of commissioning services across Greater Manchester. LPC’s are restricted from holding and administering contracts for the provision of services and are therefore unable to properly fulfil the role that commissioners would require of us.

Effective negotiation locally across GM. One contract, 706 pharmacies across GM.

CHL as a ‘Provider Company’ working solely on behalf of you, the pharmacy contractors, would be able to enter into a contract with a commissioner and would therefore be able to subcontract to pharmacies, or indeed to other providers as appropriate.

As a member of CHL all pharmacy contractors, irrespective of size, would be able to compete and tender for services alongside other qualified providers.

Community pharmacies offer patients an unrivalled access to healthcare advice and services. Not only is this of benefit to patients, it also reduces the workload of GPs and, ultimately, secondary care.

2. DEVELOPING BUSINESS CASES TO INTEGRATE PHARMACY INTO PRIMARY CARE.

GPs have already set up provider companies in GM. By joining CHL we can work to build a strong track record in bidding for and running effective services.

We plan to work with commissioners to develop ideas that meets the healthcare needs of the GM community while sourcing new income streams for pharmacies through the provision of those services.

3. COST EFFECTIVE PROJECT DELIVERY.

We plan to produce cost effective projects bids with pace, delivered on time with improved outcomes for the GM patients. Contracting services through CHL means that contractors would benefit from being encouraged to deliver the service through incentives and performance management.

It’s your company, working for you to deliver new opportunities. Come join us!
