TUF Electric

Project: Commercial Strip Mall

Complete electrical base building build out of a 29 unit commercial strip mall. Starting with a clean slate we began with the underground conduits and conductors and worked our way to the top finishing with the roof top units. This project required a 2400 amp service as well as a complete fire alarm system.

TUF Electric

Project: Mac's Convenience stores

TUF Electric has successfully completed the electrical scope of work on multiple new builds for Mac's. Included in these was 2015 build of the Jacksonport flagship store. As well as new builds TUF electric executed the "Just Great Coffee" program in over 70 stores throughout southern Alberta in 2016/2017.

Project: Tim Hortons

In 2018 TUF Electric has completed full renovations of the Chestermere and Lethbridge stores which were done in an unbelievable 2 week time period per store. TUF Electric was also a part of the team who built the new location in Chinook Center mall.

TUF Electric

Project: Sugar Coat Nail Salon

This was a complete design build with the salon owners. We started with a clean slate and they let us use our knowledge and experience to develop an inviting atmosphere for aesthetics.

TUF Electric

Project: Scotia Bank, Mission

A Complete overhaul was performed by TUF Electric taking a vintage building and transforming it into a sparkling new bank. This project was a challenge to say the least as items needed to be modified daily due to the age of the building. Although the job went beyond the scheduled timelines due to the challenges for all trades it turned out to be a vibrant new bank at the end of the day

TUF Electric

Project: Rocky Mountain Chocolate Factory, Cross Iron

During the 2016 relocation of the food court TUF Electric had the pleasure of building this store from scratch. This project included a variety of special display lighting items to illuminate the delicious product available to the consumer

TUF Electric

Project: Best Western, Airdrie AB

Full lobby, reception desk and meeting rooms were the scope of work on this project. Relocation and upgrading to all electrical aspects including fire alarm. The overall space went from a prehistoric and dim atmosphere to a modern and inviting space

TUF Electric

Project: Crossfit Sunalta

For this project we had to take a dirty old mechanic shop and transform it into a bright and lively atmosphere where people could better themselves. Lights, power and sound were all provided and installed by the TUF crew

TUF Electric

Project: Clay Oven, Indian restaurant

A hands on approach with the owners resulted in the completion of one of Calgary's most authentic and modern Indian food restaurants. As this restaurant also does a lot of catering the electrical requirements needed for a successful kitchen were far more than you could imagine from the front of house.

Project: Eveline Charles, Market Mall

Starting with an old and tired salon TUF Electric helped transform this space into one of the most up to date beauty centers in Calgary. Feature items include a dozen crystal chandeliers, art lighting, and lit up display shelves.

Project: Amaranth Whole Foods

A complete lighting transformation has occurred in multiple of the Amaranth Stores in Calgary with the help of TUF Electric. Upgrading from old fluorescent fixtures casting shadows on the product to new LED track lights has brought new life to the shelves of these locations

TUF Electric

Project: Heathens Brewing and Supply

Transformation of an existing wood working shop is underway as we are currently working to provide the electrical necessities for a small craft brewery.

Project: Omega Developments

Omega Developments is constantly providing us with challenges in their many existing properties located in Calgary and Edmonton. These challenges include renovating existing apartment units to new suites, upgrading commercial spaces for new tenants, upgrading tenant spa areas and many other interesting things

Project: HGTV's Property Brothers

Working with the general contractors to take old living spaces and turning them into dream living spaces while being filmed for television.

Testimonials

Scotia Bank Renovation

The boys at TUF were outstanding on my commercial renovation. They were always ahead of schedule, provided a high quality of workmanship and were very professional. I have, and will continue to recommend Tyler and his crew to all of my colleagues for both residential and commercial work. - Chris Warren

Electrical Inspection

My insurance company was requiring a professional safety inspection to be done on the electrical aspect of our home (due to the home being older and having aluminium wiring throughout). I did not hesitate to contact Tyler from TUF Electric as referred by a family member to find out if he was able to do a more rural location (about 45 mins outside Calgary). To my surprise Tyler was more than willing to do so and accommodated us to perfectly time it with our work schedule and their's. He sent one of his technicians who was prompt and very pleasant to deal with. I was extremely impressed by the efficiency and ethics behind the inspection and the correspondence before and after to confirm our satisfaction was met. I will have no issues referring any of my friends to use TUF Electric and will choose them again with any electrical questions and/or projects we have in the future. Thanks for your help boys!! Excellent to see electricians who truly care about doing the job right! - Davey P

Basement Reno

Tyler from TUF is a Master Electrician and was friendly, fast, accommodating, tidy and came in under budget. We were very impressed with his work, and I highly recommend him to anyone looking for the job to be done right the first time. Look no further. - Kenton
