

PATRIOT PAT-BLAL Bariatric True Low Air Loss Mattress System

- 42" or 48" wide, 800lb. capacity
- True low air loss therapy provides the ideal microclimate for wound healing
- Three pressure zones (head/body/foot) for advanced pressure redistribution
- Gentle pulsation cycle to assist in stimulating blood flow
- Comfortable low shear, low friction vapor permeable cover
- One touch AUTOFIRM to facilitate transfers and position changes
- Key pad lockout eliminates unauthorized changes to therapeutic settings

“Up to 1000 liters of air per minute are delivered to the patient surface to provide the ideal microclimate for wound healing as the surface gently pulsates to aid in stimulating capillary blood flow.”

The Kair Medical PAT-BLAL, provides advanced pressure redistribution with true low air loss therapy to provide the ideal microclimate for wound healing with a capacity of 800lbs. Delivering up to 1000 liters of air per minute to the patient surface reduces heat and moisture build-up at the patient-surface interface. Reducing heat and moisture reduces the detrimental effects that heat and moisture can have on pressure, shear and friction. Three modes of operation and simple comfort adjustments allow the user to customize therapy to the individual patient. Static mode provides constant true low air loss therapy. Pulsation mode delivers a smooth gentle pulsation to aid in stimulating capillary blood flow. Engaging the Autofirm mode quickly provides a uniformly firm surface to facilitate care giving from position changes to transfers.
