Andy Clementz, Principal
Integritas Systems LLC
P.O. Box 458
Yorkville, IL 60560

To Whom It May Concern:

Integritas Systems LLC served as general contractor for the recently completed Sludge Drying Bed Roof project for the Sheridan Sanitary District, for which we provided design and construction oversight services.

Integritas Systems maintained a high level of professionalism and workmanship from project commencement to completion. Andy Clementz and Bob Browning were our points of contact throughout the project. Andy and Bob maintained proper communications per the contract documents, submitted project submittals in a timely fashion, and were willing to work actively with the owner and engineer to resolve issues that arose in the field.

After working with Integritas Systems successfully, it is clear they have earned a positive recommendation from us. Feel free to contact me at (815) 433-2080 to discuss our experience with Integritas further.

Very truly yours,

McCLURE ENGINEERING ASSOC., INC.
