

Howard Rotavator

Gem & 350

Self-propelled, hand controlled Rotavators . . . Two of the finest tillers manufactured anywhere in the world . . . These Rotavators will outwork, outdig and outlast any other tiller in their horsepower class. These are versatile tools for a wide range of uses . . . from small organic garden work to professional landscaping operations. The professionals from "Howard . . . world leaders in Rotary Tillage."

Engine: Gem—Wisconsin 9.2 or 15.2 H.P.
350—Kohler 6.2 H.P.

Tillage Widths: Gem—20", 24" & 30"
350—16" & 23"

Tillage Depth: Gem—Adjustable to 9"
350—Adjustable to 6"

Transmission: Gem—3 forward speeds & safety reverse.
350—4 forward speeds & safety reverse.

Both of the self-powered models in the Howard Rotavator line combine all of the features that have made Howard the leader in rotary tillage equipment throughout the world. They are compact, portable, and powerful . . . designed from the ground up to produce professional results for professional needs.

These hand-operated tillers are unequalled for power and dependability. They provide positive control of both speed and depth at all times, capable of cultivating, mulching, and thoroughly mixing soils to the exact tilth desired . . . all in a single pass. Their lightweight, complete portability makes them additionally valuable to growers with remote operations, and rental yards, who require a rugged, dependable machine that can be easily transported.

The Gem

Pure brawn! Here is a self-powered rotary tiller that has the rugged strength and stamina to give years of dependable service in the most demanding applications of industrial users and commercial

growers. Yet it is engineered with such precise balance that its operation is as sure and easy as models many times smaller . . . with all the maneuverability required to work close to tender young plants, or turn sharply in confined areas.

Developing up to 15.2 horsepower, the Gem has three forward gears to give it a wide range of operating speeds. The safety reverse gear provides even more ease in handling in confined areas, and the handlebars are adjustable either up and down or side to side to provide the operator with both the comfort and flexibility of control while working.

The Howard Gem will dig to a maximum depth of nine inches, and at widths of 20", 24", or 30". A three speed transmission allows the operator to match the speed of the work to the job at hand, assuring the grade and depth of till required under all conditions. Full differential for ease of maneuverability and differential lock takes the load off the operator.

The 350

This is a lightweight, compact, and powerful Rotary tiller. Its light touch control, ruggedness, and dependability make it ideal for the man who demands professional quality at a reasonable price.

Two working widths are available—16" and 23"—making the Model 350 readily adaptable to a wide range of applications. Its easy maneuverability is a feature most attractive to nurserymen needing narrow-row weed control. It also provides excellent inter-row cultivation

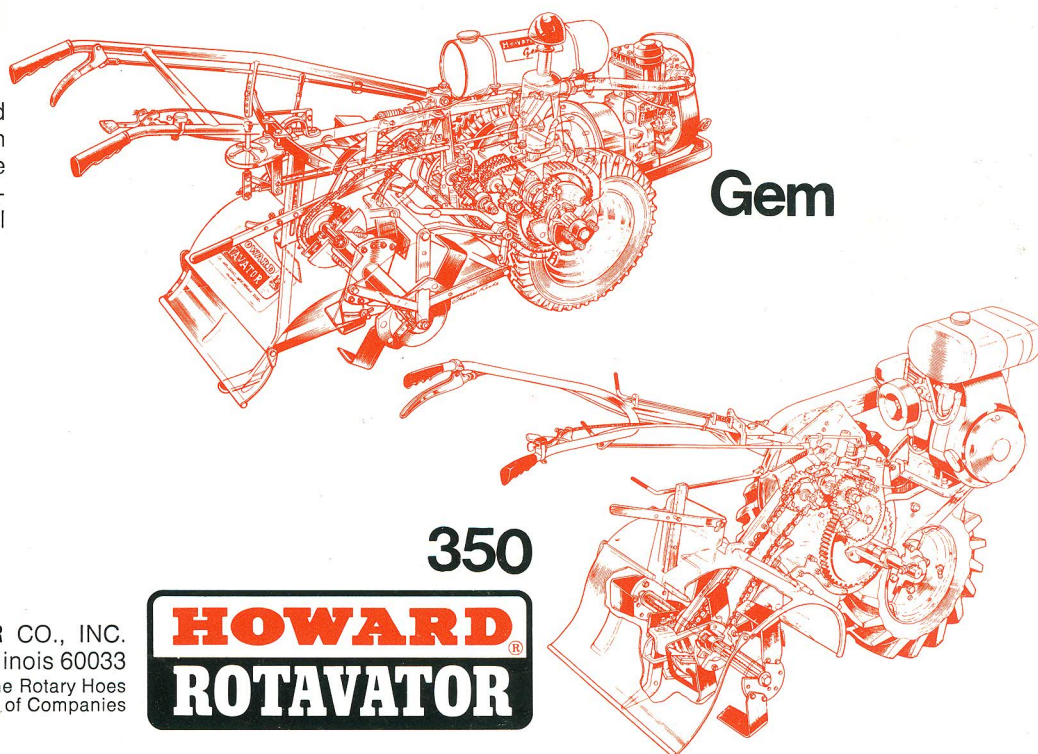

for shrubs, flowers, nursery stock, and vegetables. It is ideal for florists, for either working in beds, or thoroughly mixing potting soil, organic additives, and nutrients with ease.

For gardeners, the 350 is an ideal implement to work in green manure cover crops, as well as for general tilling, cultivating, and mulching operations. In all applications there is the added assurance that this hand-operated, self-powered tool will do a better job than any other tiller in its horsepower class!

Model 350 develops up to 6.2 H.P. giving a choice of four forward speeds and two reverse speeds to provide the exact combination of speed and power to match any type of work and soil condition. The safety reverse gears provide additional ease of handling in confined areas. To provide even greater comfort and control while operating, the handlebars are adjustable both up and down and from side to side.

Wide range of models

Howard manufactures a complete range of tractor mounted Rotavators. There are eight series with a total of 23 models up to 180" wide. Contact your local Howard dealer or write direct for complete specifications.
