RE: Rosemary Petchell

TO WHOM IT MAY CONCERN:

My husband and I took over an existing business that has been there for 12 years. We knew that there was a website for the business which is called Admiral Peabody's Lakeside Lodging. The original owner never used her website for bookings. All of her lodgers were by referrals and return customers and she used email and telephone. When we took over in May of this year we took over all of her original lodgers list, but wanted to expand to others that did not know of this hidden gem that is on beautiful Seneca Lake.

Rosemary was referred to us by Fred Hall whom I had taken over his position at the Schuyler County Historical Society as treasurer. She did an overhaul of our website and it is great! So from there I called her and set up an appointment.

Rosemary is so knowledgeable in this field and she helped us from beginning to end. She gave us all the advice we needed as she was building the website. She even came and took more pictures than what we originally gave her as her expertise and a great eye opened it up for perfection. Rosemary also came to the business when the website was ready to be released and went step by step and showed us how to go to each area of the website; and also, how to update when we needed too, but she reassured us that she is always a phone call away if we cannot do something.

My husband Luke and I are very happy to have had her do our website and our business is already growing. Rosemary I cannot say the enough words. We are very happy and will refer her if anyone needs a website built or even if someone needs an overhaul of an existing one.

Thanks

Jane and Luke Leszyk
