## OFFICIAL PROCEEDINGS OF THE COUNTY BOARD LAKE COUNTY, MINNESOTA

Tuesday, October 24, 2017. Lake County Service Center, Split Rock River Room, 616 Third Avenue, Two Harbors, Minnesota. County Commissioners Present: District 1 Commissioner Peter R. Walsh, District 2 Commissioner Derrick (Rick) L. Gouthermont, District 3 Commissioner Richard (Rick) C. Hogenson, District 4 Commissioner Jeremy M. Hurd, District 5 Commissioner Rich Sve. County Commissioners Absent: None. Also present: County Administrator Matthew Huddlestone and Laurel D. Buchanan, Clerk of the Board. Board of Commissioners meeting was called to order at 2:00 p.m. by Chairperson Rich Sve. Unless otherwise stated, all actions have been approved by unanimous yeas vote. Members of the public were present. Commissioner Sve led the audience in the recitation of the Pledge of Allegiance.

### MOTION GOUTERMONT, SECOND HOGENSON: 01 - Approve agenda with addition. Absent: None

Lake County Auditor Linda Libal inquired during the public comment period about a United States Census Bureau packet that Lake County will be completing and which county department will be responsible for compiling the data and administering to the census bureau. County Administrator is reviewing the census packet and will follow up with the County Auditor on this.

Jim Miles, Traffic Engineer from the Minnesota Department of Transportation (MnDOT) appeared before the Lake County Board of Commissioners to propose implementation of sinusoidal rumble strips as a test strip near North Shore Mining in Silver Bay, Minnesota. Cleveland-Cliffs, Inc. has approached MnDOT about safety concerns at the mine during fog conditions and what can be done to create a safer driving environment in this industrial zone. Fog creates a dangerous situation with low visibility. Rumble strips are well-established and effective tools for reducing the number of lane departure crashes by producing vibration and noise in the vehicle to alert the driver. Cleveland-Cliffs, Inc. Public Affairs Manager Sandra Karnowski and Mechanical Engineer Jesse Aultman were present for the discussion. Mr. Miles explained the sinusoidal rumble strip design and how this newer design is much quieter than the rumble strips that had been removed after a noise analysis was completed. MnDOT removed most of the centerline strips after receiving many complaints statewide about noise disruption. These studies are in response to objections raised by some landowners about the unwanted noise caused by vehicles traveling over rumble strips when they drift over the edge or centerline of the roadway. By changing and modifying the design, the ultimate goal is to provide maximum safety by capturing the driver's attention through in vehicle generated sound levels while minimizing the associated external noise generated by the rumble strips. Researchers analyzed the volume and tone of the sounds produced by different rumble strip designs. The quieter sinusoidal rumble strip design has a sine wave pattern. The louder design has a sharp-edged, rectangular rumble strip design that is drilled into the pavement. MnDOT and Cleveland Cliffs, Inc. are recommending trying the new sinusoidal rumble strips along that portion of the corridor. Mr. Miles informed the County Board of Commissioners that the Federal Highway Authority (FHWA) person recommended these centerline rumble strips and shoulder strips. Wet reflective pavement markings are also recommended. Mr. Miles provided maps showing where sinusoidal strips are currently installed in District 1, in the state of Minnesota. A project that is coming up next year has already been let. MnDOT would be adding this component to that project. It was discussed that if we are going to try it, this would be the place to try it. Mr. Miles believes this will make a big difference in that corridor. Mr. Miles discussed three components to this: 1) safety component; 2) continue plant operations of the mine; 3) potential foothold for future Highway 61 projects if people realize that there is not a sound problem with the new design of the rumble strips. Commissioners expressed support of implementing the new design in this limited stretch of the corridor and stated that Lake County could put this into a resolution format in the near future. Commissioners advised that they need to hear community response to these rumble strips, and assess noise levels with the new rumble strip design before they would be in favor of implementing sinusoidal rumble strips in any future Highway 61 projects.

County Administrator Matthew Huddlestone introduced Bob Sworski, an architect with CBS Squared, Inc., an architectural firm that is working to achieve the most cost-effective project solution for Lake County's Highway Department's infrastructure needs following the fire that occurred in the Two Harbors Garage. Mr. Sworski and CBS Squared, Inc. President Sheryl Clafline, Civil Engineer also appeared before the Lake County Board of Commissioners for a Proposed Highway Facility Presentation. Ms. Clafline has over 25 years of experience in Civil / Municipal Engineering and Planning. Mr. Sworski has over 26 years of experience in architecture and the building industry. Their company's architectural project portfolio is built from a comprehensive blend of studies, evaluations, new construction, expansion, renovation, and alteration projects. Successful projects entail great planning, quality construction documents and owner involvement. The proposed structure has a total area of 40,750 square feet, about an acre in size. Mr. Sworski and Ms. Clafline presented the building plans, including the proposed layout of the building and discussed its design and features, including a mezzanine floor. The presentation included a drawing of the preliminary architectural design for a proposed new highway department building. The floor plan for the garage illustrates how the space would accommodate equipment. The design also includes vehicle storage, sign storage, soils lab, indoor wash bay, welding bay, tool room, lube room, parts room, maintenance repair area, vehicle lift, breakroom, training room, women's locker, men's locker, offices, and records storage. Administrative offices floor plan is included in the scope of the proposed project. A fire sprinkler system is included in the design. Lake County Highway Engineer Krysten Foster and Lake County Facilities Maintenance Manager Kevin Traster were

present for the discussion. Roof design, ethylene propylene diene monomer (M-class) (EPDM) rubber roofing materials, and slopes for flat roofs were also discussed. In-floor heating systems were also discussed. Insulation, flooring and other construction materials were also discussed. Communication between CBS Squared, Inc. and Lake County will continue throughout the project as needs and wants are determined and prioritized. Ms. Clafline emphasized how CBS Squared, Inc. helps its clients stay within an established budget.

### MOTION WALSH, SECOND GOUTERMONT: 02 - Recess County Board of Commissioners' meeting at 3:15 p.m. Absent: None

The County Board of Commissioners' meeting was reconvened at 3:25 p.m. will all members present. County Administrator Matthew Huddlestone introduced our new Lake County Information Technology Director Boris Naschansky. Mr. Huddlestone followed up with the Board of Commissioners on the recent presentation from the Lake County Public Health Department regarding proposed changes to the smoke-free ordinance and when a public hearing could be scheduled. Commissioners discussed that an existing board meeting would be a good venue and suggested that a public hearing could be held at an upcoming meeting of the Committee of Whole. Mr. Huddlestone will follow up with our Health and Human Services Department to advise them of potential meeting dates.
