and Chiefs of Police**

# WYOMING DEPARTMENT OF TRANSPORTATION – Highway Safety Program

## ALCOHOL AND CRIME IN WYOMING: 2016

April 2017

The analysis of the data collected by the Wyoming Association of Sheriffs and Chiefs of Police and the printing of this report was made possible through the assistance of Federal 402 Highway Safety funds received from the Wyoming Department of Transportation – Highway Safety Program. The Project was managed by Johnson and Associates of Douglas, Wyoming. The report was authored by Ernest L. Johnson, Director of Services.

### INTRODUCTION

The Wyoming Association of Sheriffs and Chiefs of Police has been collecting substance-related data from all persons booked into county detention facilities in Wyoming since 2005. The data-collection process has been refined since that initial effort and has now been institutionalized as a part of the book-in process year-round for all custodial arrests in all twenty-three counties in Wyoming.

Although it had long been suspected that alcohol was a factor in a large number of custodial arrests in Wyoming, reliable data had not been available previously to more accurately determine the scope and impact of alcohol on crime in this state. A sufficient amount of substance-related arrest data has been collected during the past twelve years

which can now be analyzed for the purpose of identifying trends relative to alcohol, as well as other drug abuse involvement in crime in Wyoming. Consistent patterns of alcohol and other drug involvement for certain crimes are now more evident and the frequency of occurrence more predictable.

This report contains an analysis of substance-related arrest information collected in all twenty-three counties in Wyoming during a twelve-month period (January 1 through December 31, 2016) by the Wyoming Association of Sheriffs and Chiefs of Police. Information was collected from a total of 15,881 persons who were arrested and subsequently detained in a county detention facility. The substance-related arrest data contained in this report provides a statistical picture of the impact that substance abuse is having on crime in Wyoming.

***To date, information has been collected from a total of 186,102 persons who were arrested and subsequently detained in a detention facility in Wyoming.*** Specific information collected during the book-in process includes the following:

- Type of offense
- Whether alcohol or other drugs were involved
- Location of last consumption and point of sale
- Known blood alcohol content levels for alcohol related arrests; and
- Demographic information

The Wyoming Association of Sheriffs and Chiefs of Police publish the results and analysis of the data-collection efforts each year in three separate reports.

The main report provides statewide statistics and averages, along with comparisons of county statistics in specific categories. An accompanying supplemental report provides county, community and local law enforcement agency specific statistics. The third report is an Executive Summary which provides selected statistics, information and highlights from the main report. These reports can be accessed online on the following websites: <http://wascop.com> and <http://jandaconsulting.com>

**EXECUTIVE SUMMARY**

This Executive Summary highlights a few of the significant findings contained in this report. It focuses on issues that are of obvious concern or which may be of greater interest to the general public; however, a careful review of other relevant findings and statistics contained in the main body of this report is essential in order to gain a more complete perspective of the impact of alcohol on crime in Wyoming.

The profile of the average person taken to jail in Wyoming continues to be relatively consistent with previous years. About eight out of ten times it was a male (although females have increased incrementally in recent years, 23% this year), average age 36. 13.5% of the time it was an out-of-state visitor and 6.7% of the time it was an in-state visitor. Juvenile arrests resulting in detention in a detention facility accounted for less than 1% of the total custodial arrests (65 out of 15,881).

A review of the data collected from persons arrested and subsequently taken to jail indicates that Wyoming continues to be relatively safe from what is generally considered to be “serious” crime. The number of persons who are arrested for felonies are relatively low when compared to the number of persons arrested for minor crimes (misdemeanors). Felony arrests accounted for 11.02% of the total arrests statewide.

*Although Wyoming is relatively “safe” from what is generally considered to be serious crime (felonies), the high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence, and the high levels of blood alcohol content for drivers arrested for being impaired represent real and significant threats to public safety.*

The information collected from a total of 15,881 persons who were arrested and subsequently detained in a county detention facility in Wyoming during 2016 confirms what law enforcement officers who patrol the streets and highways and who respond to calls for service in Wyoming already know

from experience – alcohol is the contributing factor most often present in situations that result in someone going to jail.

**Meth. Alcohol and Other Drugs Involved Arrests**

**SUMMARY OF SUBSTANCE-INVOLVED ARREST STATISTICS FOR 2015:**

- Alcohol was involved in 57.01% of all custodial arrests.
- Methamphetamine was involved in 8.48% of the 15,881 reported arrests.
- Marijuana was involved in 12.22% of all custodial arrests.
- Drugs were involved in 20.33% of the reported arrests.
- Arrests for public intoxication accounted for 12.86% of all arrests.
- The average blood alcohol content for persons arrested for public intoxication was 0.2317.
- Driving under the influence arrests accounted for 26.70% of all arrests.
- The average reported blood alcohol content for DUI arrests statewide was 0.1591.<sup>1</sup>
- 50% of persons arrested for DUI had a reported BAC level above 0.16 and 11% had a BAC of 0.24 or greater.
- The average reported BAC for 536 persons who were arrested for DUI after being involved in a traffic crash was 0.1676.
- The age group with the highest percentage of DUI arrests was age 26-30 (17%), followed by age 21-25 (16%) and 31-35 (12%).

<sup>1</sup> In Wyoming, a person driving with a blood alcohol content of 0.08 is legally presumed to be impaired.

*To grasp the significance of the blood alcohol content statistics, it should be noted that a physically fit male who weighs 180 pounds would have to consume at least seven drinks in one hour to achieve a BAC of 0.15 – a female weighing 120 pounds would have to consume five drinks in one hour.*

Please refer to the Alcohol Impairment Educational Guides for males and females in the Attachments Section of this report for information about the level of impairment for other body weights and drinks consumed.

### EMERGING TRENDS

**EMERGING TRENDS IN THE TYPE OF SUBSTANCE INVOLVED IN CRIME:** Alcohol and/or other drugs were involved in 75% of the 15,881 custodial arrests in 2016. Although alcohol-involved arrests continue to be the drug most often present in situations that result in someone going to jail, changing trends in the types of substance involvement in crime in Wyoming have emerged recently.

During the last seven years in which data is available for a calendar year period (2010-2016), the number and percentage of *alcohol-involved arrests have decreased* - while the number and percentage of *other drug-involved arrests have increased*.

The number of alcohol-involved arrests have decreased each year since 2010. Alcohol-involved arrests in 2016 were 4,545 fewer in number (a 33% decrease) than in 2010.

The number of other drug-involved arrests has increased each year since 2010 (except for one year). Drug-involved arrests were 1,437 more in number (an 80% increase) than in 2010.

The number of meth-involved arrests has increased each year since 2010 and has more than doubled during the last three years. There were 1,346 meth-involved arrests in 2016 (311 more than 2015).

The Association began collecting marijuana-involved arrest data in March of 2014 in an effort to assess the impact on public safety in Wyoming from Colorado's legalization of marijuana. Data collected thus far indicates an increase in the number and percentage of marijuana-involved arrests in 2016 – 12.22% for 2016 compared to 9.5% for 2015.

The four counties with the highest number of arrests involving marijuana were: 1) Laramie – 364; 2) Natrona – 231; 3) Sweetwater – 226; and 4) Albany – 198.

## Alcohol and Crime in Wyoming - 2016

### Substance-Involved Arrests: Number of Total Arrests

<b>2016</b> 9,054	<b>2016</b> 1,346	<b>2016</b> 3,229	<b>2016</b> 2,677	<b>2016</b> 3,729

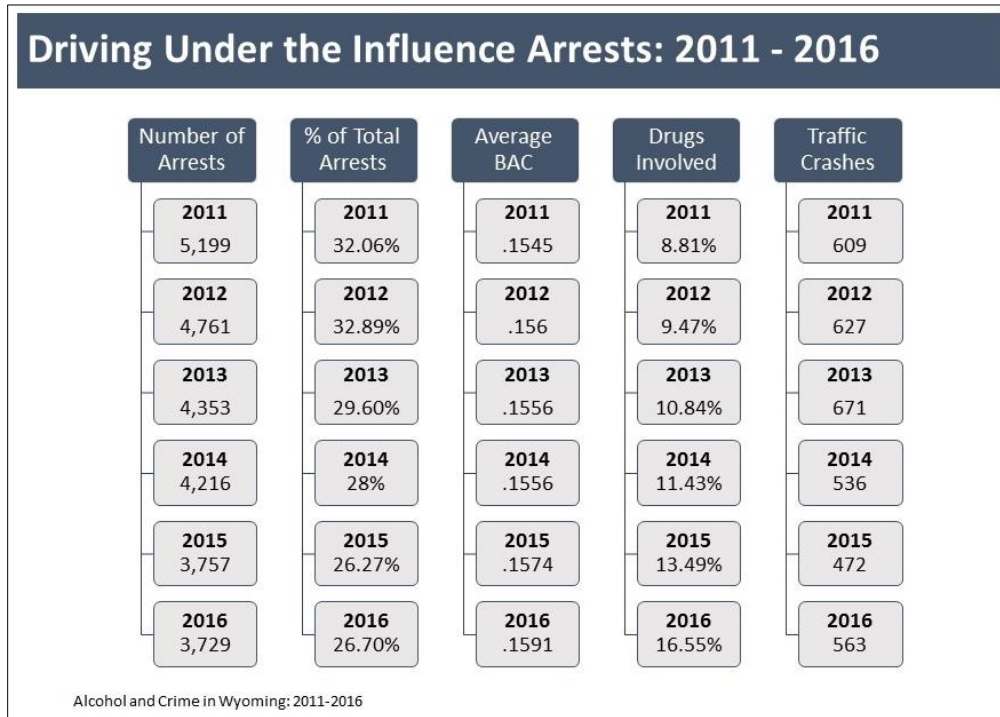

Alcohol and Crime in Wyoming: 2012-2016

## Alcohol and Crime in Wyoming - 2016

**TRENDS IN ARRESTS FOR IMPAIRED DRIVING:** The statistics for persons arrested for driving while impaired mirrors the recent trends for all substance-involved arrests. The percentage and number of persons arrested for driving impaired has decreased during each of the last five years while the percentage for other drug-involvement for impaired driving arrests has increased.

And, the average blood alcohol content for persons arrested for impaired driving during the last seven years remains at double the presumptive level for impairment – while the average blood alcohol content for persons arrested for public intoxication remains at almost three times the presumptive level.

## Alcohol and Crime in Wyoming - 2016

Although the number and percentage of DUI arrests have decreased statewide in each of the last three years, the percentage of DUI arrests in several counties in the state have been consistently above the statewide average.

**PUBLIC CONCERNS**

*The statistics contained in this report identify significant public safety issues which merit further discussion, analysis and action by local law enforcement, citizens and state/community leaders*

The high percentage of alcohol involved arrests (57%), the inordinate number of arrests for public intoxication (2,677) and DUI (3,729) and the high levels of BAC recorded for these individuals (average BAC: 0.2317 for public intoxication and 0.1591 for DUI) appear to validate the concerns about alcohol abuse expressed by Wyoming residents in the most recent statewide public opinion survey<sup>2</sup>.

Some excerpts from the survey that involved 4,798 Wyoming residents:

- 79.7% view alcohol abuse by Wyoming adults as a serious or somewhat serious problem
- When Wyoming residents were asked whether they would support a state law that would prohibit selling or serving alcohol to someone who is obviously intoxicated:
  - 64.3% strongly supported such a law
  - 17.9% somewhat supported such a law
- 84.5% of Wyoming residents believe that drinking and driving in their community is a serious or somewhat serious problem.

<sup>2</sup> Wyoming Alcohol Use Issues Survey, Wyoming Survey & Analysis Center, November 2012

## SIGNIFICANT STATISTICS AND FINDINGS

This report provides statewide statistics and averages, along with comparisons of county statistics in specific categories. In addition, there are approximately one hundred pages of data in a supplemental report that provides county, community and local law enforcement agency specific statistics.

Detailed charts and graphs included in the Data/Statistics section of this report are helpful in identifying trends involving alcohol-related arrest activity and provide a statistical picture of the circumstances which result in someone being arrested and subsequently taken to jail in Wyoming. The impact of substance abuse on crime statistics varies by county across the state. This report also includes a detailed analysis by county for comparison purposes.

Listed below are a few of the noteworthy statewide averages and county specific alcohol-related statistics and findings from the Data/Statistics section of this report.

\*\*\*\*\*

- **Alcohol was a factor in 57% of the custodial arrests in Wyoming.**
  - Counties with significantly higher statistics:
    - Teton – 89.3%
    - Sheridan – 73.46%
    - Fremont – 67.23%
  
- **Methamphetamine was involved in 8.48% of the arrests statewide.**
  - Counties with significantly higher statistics:
    - Lincoln – 17.27%
    - Weston – 15.58%
    - Uinta – 14.05%
  
- **“Other” drugs were involved in 20.33% of the reported arrests statewide.**
  - Counties with significantly higher statistics:
    - Platte – 40.34%
    - Carbon – 39.04%
    - Lincoln – 34.89%
  
- **Marijuana was involved in 12.22% of the arrests statewide.**
  - Counties with significantly higher statistics:
    - Platte – 33.61%
    - Carbon – 26.58%
    - Converse – 22.09%
  
- **Arrests for Public Intoxication accounted for 12.86% of all arrests statewide.** *(The statewide average does not include 729 persons who were admitted into the VOA Detox Center for public intoxication)*
  - Counties with significantly higher statistics:
    - Fremont – 27.54%
    - Teton – 25.35%
    - Laramie – 21.74%

## Alcohol and Crime in Wyoming - 2016

---

- **The average blood alcohol content for all persons arrested for public intoxication was 0.2317.**
  - Counties with significantly higher statistics:
    - Goshen – 0.3090
    - Carbon – 0.2891
    - Sheridan – .2483
  
- **Driving under the influence (DUI) arrests accounted for 26.70% of all arrests statewide.**
  - Counties with significantly higher statistics:
    - Teton – 48.73%
    - Campbell – 45.30%
    - Big Horn – 43.93%    Sheridan – 43.85%
  
- **16.54% of the arrests for DUI involved drugs.**
  - Counties with significantly higher statistics:
    - Carbon – 33.33%
    - Big Horn – 21.91%
    - Lincoln – 24.10%
  
- **The average blood alcohol content (BAC) reported for 3,729 persons arrested for driving under the influence statewide was 0.1591.**
  - Counties with significantly higher statistics:
    - Niobrara - 0.2190
    - Goshen - 0.1970
    - Fremont - 0.1756
  
- **19.36% of traffic crashes resulting in arrests involved drugs.**
  - Counties with significantly higher statistics:
    - Weston – 42.86%
    - Niobrara – 33.33%
    - Carbon – 31.58%
  
- **The average BAC reported for 563 arrests involving traffic crashes that involved alcohol was 0.1720.**
  
- **50% of the persons arrested for driving under the influence had average blood alcohol content above 0.16.**
  
- **756 persons were arrested with a BAC of 0.20 or higher**
  
- **222 persons were arrested with a BAC of 0.24 or higher**

**JUVENILE/ UNDERAGE DATA**

The data in this report does not represent a complete accounting of juvenile arrests as these arrests often do not result in detention in a county facility.

158 underage youth were taken into custody and placed in a detention center this year for being a minor in possession of alcohol. The average BAC was .1387.

185 underage youth were arrested for driving under the influence – 62 of these arrests involved drugs. The average BAC was .1313. Nine of the underage youth arrested were under the age of 18.

- 5% of all persons arrested for driving under the influence (DUI) were under the age of 21.
- Juveniles accounted for less than 1% of the arrests statewide (65 total).
- 28% of the juvenile arrests involved alcohol (18 total).
- None of the juvenile arrests involved methamphetamine.
- 10 of the juvenile arrests involved marijuana.
- 18.46% of the juvenile arrests involved “other” drugs (12 total).
- 155 minors arrested for alcohol-related offenses reported obtaining alcohol at:

### **PROJECT DESIGN AND IMPLEMENTATION**

The Wyoming Association of Sheriffs and Chiefs of Police contracted with Johnson and Associates, a Wyoming based management consulting firm, to manage and staff this project – to create the master database, to collect and input data, to author the final report and to make presentations to select groups. The Association has contracted with Johnson and Associates to manage and staff this project since its inception.

A task force comprised of administrators and detention facility personnel from each of the county law enforcement agencies involved in the initial data collection efforts in 2005 determined the scope and intent of the project and provided specific direction for its implementation. In the following years, all law enforcement and detention facility administrators in the state were involved in deciding the appropriate fields for collection of data, selecting the subject areas that would be targeted for analysis and refining the process and procedures for collecting the information.

A supply of reporting forms and self-addressed stamped envelopes were provided to all detention facilities in the state - along with an instruction sheet for processing the completed reporting forms. In addition, all detention facility personnel who were assigned the responsibility to oversee their agencies' data collection were provided individual orientations. All completed reporting forms were submitted to Johnson and Associates for data entry on a weekly basis.

The master database for this project was created in a manner that will allow “harvesting” of additional information in the future should a need arise. The data in this report is presented by “county” and by “department,” by actual numbers and percentages, and by various categories of interest. The information was assembled in this manner to assist law enforcement administrators, as well as community leaders, to better analyze the information and to facilitate follow-up inquiries of notable concerns.

### **DATA COLLECTION**

A one-page reporting form consisting of fill-in or checked boxes was constructed and refined for this project. It is estimated that the form requires the booking and/or arresting officer two-to-three minutes to fill out during the book-in process. Specific information that was collected during the book-in process include: type of offense, whether alcohol was involved; whether drugs were involved; location of last consumption and point of sale; known blood alcohol content levels for arrests involving public intoxication, driving under the influence and minors in possession; and demographic information. (A sample of the reporting form is included in this report)

A total of 15,881 reporting forms were submitted by the twenty-three county detention facilities and the Volunteers of America Detox Center in Fremont County during the twelve-month data collection period January 1 through December 31, 2016. A complete accounting of the number of reports submitted by each county compared to the number of actual field-arrests book-ins is provided after the Data/Statistics pages.

### DATA /STATISTICS

All information contained in the reporting forms that were submitted by the participating counties was entered into a master data base by week and by month. This information was subsequently assembled by category, by county, and by department to facilitate appropriate comparisons and further analysis.

A detailed breakdown of information for each county is available in a separate Supplemental Report.<sup>3</sup> A sample of the county statistics is included in this report. Natrona County was selected as the sample to be included as this county generated the greatest number of arrest statistics.

The substance-related arrest data in this report is presented in a series of tables and graphs:

- ❖ Tables – Number of Arrests and Percentages
- ❖ Pie Chart – Methamphetamine, Alcohol and Other Drugs
- ❖ Tables – Felony/Misdemeanor Arrests Involving Alcohol
- ❖ Bar Graphs – Alcohol Arrests Percentages, BAC
- ❖ Pie Graphs – DUI, BAC, Traffic Crash Statistics
- ❖ Tables and Bar Graphs – Juvenile Statistics
- ❖ Pie Graph – Juvenile Demographics, Where Minors Obtain Alcohol
- ❖ Table – Natrona County Statistics (Sample County Statistics)

**PLEASE NOTE:** Cheyenne Police Department officers have an option to cite and release persons arrested for DUI for a first offense and the arrestee's vehicle has been impounded. These additional arrests statistics have not been included in the DUI statistics in this report (as they were not booked into a detention facility) but are added as a footnote in the DUI graph and in the Supplemental Report for Laramie County.

\*NOTE: VADC Not Included in DUI as a percent of total. Cheyenne PD officers have an option to cite and release persons arrested for DUI for a first offense when the arrestee's vehicle has been impounded. There were 72 persons arrested for DUI who were released - their numbers are not included in the Statewide or county statistics. These include 46 males with an average BAC of 0.1601 and 26 females with an average BAC of 0.1718.

\*Total of percents in Location of Consumption and Point of Sale categories may exceed 100% due to single arrests involving more than one location or point of sale.

No public events name in alcohol collection reports.

ACKNOWLEDGEMENTS

This project was accomplished due to the committed support of all the law enforcement administrators in Wyoming, and the Sheriffs' generous commitment of agency resources. The day-to-day supervision and weekly submittal of the project reporting forms and the individual efforts of the hundreds of arresting/detention officers who filled out the reporting forms should be acknowledged as well. Their collective efforts were essential to the overall success of this project.

# EVALUATION OF ALCOHOL FACTORS IN CUSTODIAL ARRESTS

## Albany County Sheriff's Department

OFFICER or CR NUMBER \_\_\_\_\_ DATE \_\_\_\_\_

The following information is being collected in an effort to evaluate alcohol factors in custodial and DUI arrests in all twenty-three counties in Wyoming. This data will be used for statistical analysis purposes only. Please fill out a separate form for every person being booked into your facility. Please fill in the information based on your knowledge of the case, personal observations, and/or questioning of the person arrested. The person should be advised that no case sensitive information is being recorded and that this information is being collected for statistical purposes only. A copy of the final report will be provided to every participating agency. Thanks for your help.

**DEPARTMENT** (Circle agency affecting arrest; if agency is not listed please fill in "Other")

Albany    Laramie    UW PD    WHP    G&F    Other: \_\_\_\_\_

**GENDER** (Circle one):    Male            Female            **AGE:** \_\_\_\_\_

### RELATED EDUCATION & EXPERIENCE:

- Twenty-four years of experience as an administrator of a state agency with direct responsibility for budget development and administration, planning, organizing, directing, staffing, and program services delivery.
- Masters degree in Public Administration; over thirty-five years of experience training and working with executives to achieve excellence in government, manage and implement change, increase organizational effectiveness and maximize program efficiency.
- Conducted in-depth management studies for criminal justice agencies for the states of Massachusetts and New Hampshire. These studies assessed the delivery of program services by agencies with statewide responsibilities and provided recommendations for increasing organizational efficiency and agency credibility.
- Over thirty-five years of experience in researching, writing, and administering a variety of federal and state grants. Grants involved in excess of several million dollars for a wide variety of purposes: personnel, equipment, training, research and providing services with targeted priorities.
- Extensive experience in researching, evaluating and implementing a wide variety of projects. These projects varied in scope and duration, and many required the involvement and partnership of multiple agencies and personnel throughout the state, as well as the enactment of state legislation.
  - Evaluation performed for the Substance Abuse Division - WDH – “Responsible Server Training Program” – October 2002
  - Managed the Wyoming First Lady’s Initiative to Reduce Underage Drinking – November 2004 to September 2006
  - Managed project and authored report: A Comprehensive Review of Alcohol State Statutes: Findings and Recommendations for Reducing Underage and Binge Drinking in Wyoming – 2008
  - Management Review of the Wyoming Seat Belt Coalition: Mission, Goals and Work Scope – September 2011
- Thirty years of experience in conducting a variety of feasibility studies
  - Conducted numerous feasibility studies for the Wyoming Legislature
