GRINDING WHEELS

Reinforced Wheels Depressed Center

FOR USE ON RIGHT ANGLE GRINDERS

- Aluminum oxide abrasive with a resin bond reinforced by layers of durable fabric to provide wheels of maximum strength and safety.
- Fast cutting** flexible, extremely durable, and economical.

* = Flexovit Brand

GENERAL PURPOSE - METAL - FAST CUT (A24N):

- Aggressive grinding with excellent life.
- Grinds aggressively in a wide range of metal applications, including harder materials.
- Aluminum oxide grain. Soft bond for fast stock removal.

HIGH PERFORMANCE - METAL - LONG LIFE (A24R):

- Smooth grinding with maximum life for an aluminum oxide wheel.
- Weld grinding, surface conditioning, notching, cutting, and all general purpose stock removal.
- The standard for long life in metal work.

EDGE GRINDING - METAL – LONG LIFE (A24T):

- Aluminum oxide grain.
- Hard bond designed for edge & bevel grinding & other applications where a harder wheel is preferred.
- Farrous metals (iron, steel, welds, etc.)

ALUMINUM – LOAD RESISTANT – (A24ALU)

- Ideal for grinding aluminum and nonferrous materials.

ABRASIVE PRODUCTS

METALHOG GRINDING WHEEL

Reinforced Wheels Depressed Center

**** Superior Productivity ** Higher Efficiency ** Longer Life**

FOR USE ON RIGHT ANGLE GRINDERS

- Type 27 grinding wheels incorporate a blend of premium, semi-premium & standard abrasive grain with custom bond systems.
- Extremely aggressive & rapid grinding action without sacrificing wheel life.
- METALHOG grinds up to 30% faster & 3 times Longer than regular aluminum oxide products.

CHALLENGER II GRINDING WHEELS

Semi-Flexible Wheels
ALUMINUM / STAINLESS / METAL

FOR USE ON RIGHT ANGLE GRINDERS

MUST BE USED AT A
MINIMUM 15° ANGLE
- DO NOT USE FLAT -

- Eliminate wheel-change downtime by grinding and finishing with the same wheel.
- **Challenger II** performs well in all metal fabrication applications.
- **Challenger II** runs virtually LOAD-FREE.
- **Challenger II** tackles stainless and hard alloy applications without glazing or dulling.
- Great for Metal, Stainless, or Aluminum.

ZIRCOTEX PREMIUM FLAP DISCS

Fiberglass Backing Plate

FOR USE ON ANGLE GRINDERS

- Made with premium zirconia alumina abrasive cloth backed by a high strength fiberglass disc.
- Ideal for high production grinding, blending, deburring and finishing.
- Perform well on a wide variety of materials including stainless & carbon steel.
- Durable grain resists loading or clogging on softer materials such as aluminum, brass, bronze & fiberglass.
- The fanned, abrasive cloth flaps wear evenly, constantly exposing new, sharp grain allowing for full use of the abrasive material.

TRIM-KUT DISCS

FOR USE ON RIGHT ANGLE SANDERS & GRINDERS

- Trim-Kut abrasive discs are a unique one piece design with the grinding surface bonded to a hard copolymer backing.
- No backing pad required.
- Grinds, sands, levels weld seams and is an excellent rust/paint remover.
- Aluminum oxide discs.

ROLON SURFACE CONDITIONING DISCS

FOR USE ON RIGHT ANGLE SANDERS & GRINDERS

- Non-woven surface conditioning products are ideal for deburring, cleaning, blending, and polishing.
- Use on mild steel, stainless, aluminum, plastic or wood.
- Connects quickly and easily to its arbor with a 1/2 right twist and removes with a 1/2 left twist.

VELCRO SURFACE CONDITIONING DISCS

FOR USE ON RIGHT ANGLE SANDERS & GRINDERS

- Non-woven surface conditioning products are ideal for deburring, cleaning, blending, and polishing.
- Use on mild steel, stainless, aluminum, plastic or wood.
- This disc pad connects quickly and easily to any power tool while holding surface conditioning discs securely and safely through the use of dual lock fastening system.

ROLOC UNITIZED WHEEL

- Roloc unitized wheels are strong, efficient products for edge deburring and finishing.
- They perform well in a variety of metal working applications and on intricate machined parts where close tolerances are important.
- The Roloc holding systems make changing unitized wheels quick and easy.

GROUP A SHAPES: Use for medium to heavy duty blending and contouring.

GROUP B SHAPES: Best for light deburring and blending.

GROUP W SHAPES: Suited for off-handed and precision grinding where medium to heavy stock removal is required.

ABRASIVE PRODUCTS

WIRE END BRUSHES

FOR USE ON STRAIGHT GRINDERS

- Use crimped for softer and knotted for more aggressive brushing.
- Use with portable tools or drill presses.
- Ideal for tight to get at areas and blind holes.

APPLICATIONS:

- Carbon Cleaning
- Die, Mold and Tool Polishing
- Rust or Paint Removal
- Burr Removal
- Weld Cleaning
- Rubber or Plastic Removal
- Spot Facing
- Cleaning Castings
