STEAM COFFIN

Captain Moses Rogers and The Steamship *Savannah* Break the Barrier

by

John Laurence Busch

Historian and author John Laurence Busch will attempt to re-calibrate your mind before showing why the proposition of making the first crossing of the Atlantic Ocean on a "steamship" was met with a mixture of skepticism and fear. He also will show how Captain Moses Rogers answered that skepticism and fear, by employing the most fundamental principles of quality to create the world's first ocean-crossing steam vessel.

When: May 5, 2016 @ 7 PM

Where: Holiday Inn Tewksbury [4 Highwood Drive; Tewksbury, MA 01876].

The *Savannah* is more than a "steamship."
She is the first example of globalized high technology in history.

Praise for STEAM COFFIN:

"Busch's supremely readable account of the development and construction of the *Savannah*...and the passionate career of Captain Moses Rogers, represents the creation of a long-needed missing piece of maritime history...It may properly be termed a page-turner, and is strongly recommended."
— (mt) *Marine Technology Magazine*

"What makes this volume is the excellent research and the fitting of the achievement into the historical events of the period...extremely well executed...If only all history books were as readable."
— *Archive Journal* (United Kingdom)

Praise for the Presentation:

"Thanks for the really informative presentation. You really did take us back to the era!"
—Robert Besal, Naval Order of the United States, Charleston, South Carolina

"I believe there were more questions from the audience than I've seen at any meeting in a long time."
—Edward Ecock, American Society of Mechanical Engineers, New York, New York
