Chief Smith Reminders

School is out and summer is officially here!

Please be mindful of the possible extra foot traffic in the area and make sure you are on the look out for kiddos on bikes and crossing the streets!

Parents please remind your kids to look both ways before crossing the streets!

As always I encourage you to always remember your outdoor pets!

Summertime humidity and high temperatures are just around the corner. These weather conditions require extra care for your outdoor pets.

- ◆ Never leave an animal in your vehicle, as temperatures inside a vehicle can reach well over 120 degrees in a matter of minutes.
- ◆ Be alert to the signs of heat exhaustion. Look for excessive panting or general lethargy, which may be signs your dog is overheated.
- ◆ Always be certain outdoor pets have access to plenty of shade and fresh water.
- ◆ Please also remember ALL DOGS that live in the City Limits of Moran HAVE to be on a leash when being walked around town and if you are letting your dogs out in the yard that's okay, HOWEVER they need to stay in your yard. We know sometimes they venture but please help us keep this to a minimum.

MORAN FOOD DISTRIBUTION

will be July 10, 2024

instead of July 5, 2024 due to the holiday.

Water Project Update

Goins Enterprises and AST are the contractors that have been working vigorously on the water project. Currently they are up on Highway 54 running new line and hope to be coming down Cedar Street very soon. Since the project has started Goins has replaced 5800 feet of new water line, as well as numerous meter connections and water hydrants.

They will continue to work throughout the summer and possibly into the fall.

All Blood Types *Needed*

Thursday 3:00pm-6:30pm

Storytime

Monday 10:00am - 10:30am

Kidtime

Tuesday 1:00pm - 2:00pm

~SUMMER LAWN CARE TIPS~

- When mowing, leave the blades of your grass slightly longer by just a couple of inches. This will help shade their roots and reduced moisture evaporation from the soil. So raise the blades on your lawn mower.
- Consider letting the grass go dormant in the summertime.
- Water early morning, very early, like at 5 am This gives the lawn an opportunity to dry before nightfall, a time when certain types of fungus are most active. This is also usually a non-peak time for most communities' water supply.
- Hold off on the fertilizer this time of year, as this would only promote growth, which means more watering and mowing.

The City would like to remind homeowners to mow your grass in a manner so that the grass is not blown out onto the roadway. Grass accumulation on the roadway can damage the structure of the roadbed as accumulated grass clippings hold water and blocks proper drainage, thereby causing subsequent road deterioration.
