

## **Advanced Network Devices AND Savvius, Inc. ANNOUNCE NEW RESELLER AGREEMENT**

**Toronto, ON – December 8, 2015** – Advanced Network Devices, Inc., a leading provider of enterprise network infrastructure solutions, has announced an agreement with Savvius, Inc. (formally WildPackets), a pioneer in network performance forensic solutions. With the newly forged partnership, Advanced Network Devices adds to its strategic list a best of breed partner for network troubleshooting and monitoring. Savvius has been helping network engineers troubleshoot and monitor enterprise networks with detailed protocol analysis, deep packet inspection and network security since 1990.

Savvius' OmniPeek and OmniEngine products are used by over 7,000 organizations around the world that require deep packet inspection of their network traffic in order to pinpoint performance issues. The products are multi-functional which means that companies can use a single solution for their different traffic types including 802.11a/b/g/n/ac wireless, VoIP, video, 10G and application performance. For advanced high performance wired applications, Savvius also offers high capacity Omnipliances which can capture network traffic on 1G, 10G and 40G links. For wireless troubleshooting Savvius is the first company to offer wireless network engineers the ability to capture 802.11ac traffic from a local USB adapter as well as a high speed Omnipliance.

“We are excited to partner with Advanced Network Devices, Inc. to offer a compelling and cost-effective suite of network protocol analyzers in the Canadian market, which will not only help Canadian businesses troubleshoot network issues but also validate and remediate cyber-attacks and network breaches,” said Mark Sendelbach, Business Development Manager, Savvius, Inc.

“We have been working to partner with Savvius Inc. for the past 18 months and we strongly see the value which Savvius' Omnipliance®, OmniPeek®, and Savvius Vigil products can bring in assisting Canadian IT network owners to improve network performance and efficiency, while increasing ROI for their businesses,” said Mike Kazemian, CEO of Advanced Network Devices Inc.

### **About Savvius**

Savvius, Inc. brings 25 years as a leader in network performance and security forensics solutions to customers in more than 60 countries worldwide. Savvius' Omnipliance®, OmniPeek®, and Savvius Vigil products enable network and security professionals to identify, understand, and respond to network performance issues and resolve security breaches quickly and comprehensively. Savvius customers include Apple, Boeing, Cisco, Fidelity, Microsoft, and over half of the Fortune 100. For more information, please visit [www.savvius.com](http://www.savvius.com).
