

CURRICULUM VITAE

PROFILE:

With extensive experience working at strategic level supporting companies to assess their internal and external positions and developing comprehensive strategy that will ensure they are well placed to achieve their objectives. Organised, adaptable & tenacious, prepared to go the extra mile to achieve seamless service deliver & meet aspirations. Able to lead a team to ensure success.

In 1995 my eldest daughter was diagnosed with End Stage Renal Failure & subsequently had a cadaveric renal transplant that same year. In 1997, my middle child was diagnosed with the same disease & following two years on peritoneal dialysis, whilst on the transplant list, I donated a kidney to her. Over the past 25 years, our family has been part of renal teams and I have dedicated my time and been actively involved in Renal Services. I have been lucky enough to be involved in all levels including Primary Care, Service Development and Commissioning.
