 Medium – 200 Series kennel 27” x 20” x 19”
 Small – 100 Series kennel 21” x 16 “x 15”

Our kennels are airline approved and meet ALL of the IATA and FAA requirements for safe air travel.

Our kennels are made with heavy-duty plastic shells, durable wire doors, wire windows on the sides, and ventilation holes on the rear side of the kennel for substantial ventilation. They come with non-corroding plastic wing nuts and we provide metal wing nuts for the airlines that require them.

We carry 6 different sizes for pets ranging from 13”-33” tall.

We provide **large** food & water bowls (not the bowls pictured above) along with a watering device attached to the outside of the door so the Airline Animal Handlers can provide your pet(s) with water without having to open the kennel. In addition, we provide absorbent material for the bottom of the kennel.

Also included are **all** of the IATA required LIVE ANIMAL stickers, which are placed in the required spaces by our agents prior to the flight.

*Small & Medium kennels have carrying handles for you convenience.
