- Zoom virtual learning session for discussion and reflection (90 minutes)

# BUILDING COLLABORATION AND COMMUNITY IN YOUR VIRTUAL OR IN-PERSON CLASSROOM

**Classroom culture and community are foundational to meaningful collaboration. When students collaborate effectively, they not only engage more deeply in the content, they also build communication skills. In this professional learning experience, participants will explore collaboration techniques that can be used both remotely and in-person to build community and culture, and enhance learning and engagement for all students.**

**MEET YOUR FACILITATOR!**

Mia Pumo is a powerful advocate for supporting teachers through dynamic learning experiences and effective coaching. After teaching for 15 years and working as an instructional coach and director of a national education partnership, she co-founded Constructive Learning Design, an organization that develops teachers and instructional coaches by using research-based instructional strategies and PD based on the science of human flourishing.
